## GERARD HAS NO ANSWER

### Germany May Offer Arbitration.

### RIGHT TO SHIP FOOD

### United States Will Then Press Its Contention.

Washington, May 17.—Without word from Ambassador Gerard as to the attitude of the German government toward the American note official Washington attached much significance to the intimations in diplomatic quarters here friendly to Germany that the latter country in its reply might offer to suspend attacks without warning on merchant ships while the United States renewed its informal proposals for the unrestricted passage of foodstuffs to civilians in Germany.

It was pointed out by well informed European diplomats that an offer of arbitration or settlement by diplomacy of the questions at issue would most certainly be made by Germany.

Officials have been reticent about discussing the idea of arbitration or the proposal with reference to foodstuffs, but it was indicated that the situation had progressed to the point where the United States would not be likely to be satisfied with any conditional acquiescence in the American position.

It was intimated that if Germany accepted the American point of view the natural tendency of the United States of its own initiative would be strongly to press its contention on the right to ship foodstuffs to Germany, a matter still under diplomatic discussion.

There is a likelihood, too, that some understanding might be reached through the medium of the American government, whereby Germany could be definitely assured that no merchant ships leaving the United States would be armed, making it possible for submarine commanders to exercise the right of visit and search with impunity.

Whether Great Britain would consent to disarm all her merchant vessels carrying contraband is a matter of conjecture. England has insisted during the present war and also maintained with much vigor in her correspondence with Russia during the Russo-Japanese war that a prize should be sunk in case of military necessity.

This position has been taken by the United States in its naval code of instructions on the theory that destruction of neutral goods of noncontraband character aboard belligerent merchantmen would require the payment of heavy damages.

## LONDON CONFIRMS REPORT

### British Forces Make Progress in Present Fighting.

London, May 17.—The following official statement was issued by the British war office:

"The first army has made a successful attack between Richebourg l'Avoue and Festubert, breaking the enemy's line over the greater part of a two-mile front.

"The attack commenced to the south of Richebourg l'Avoue, where we captured two successive lines of German breastworks on a front of 800 yards. A mile further to the south another attack, in which we carried 1,200 yards of German front line trenches and was pushed rapidly on, extending its success 600 yards further south, by bombing along the German trenches. Here we crossed the Festubert-Quinque road and advanced nearly a mile into the German lines.

"The fighting still continues in our favor and our brave troops have fought splendidly."

## RUSSIANS ARE RETREATING

### Vienna Reports Successes at Several Disputed Points.

Vienna, May 17.—The following statement was issued at the army headquarters:

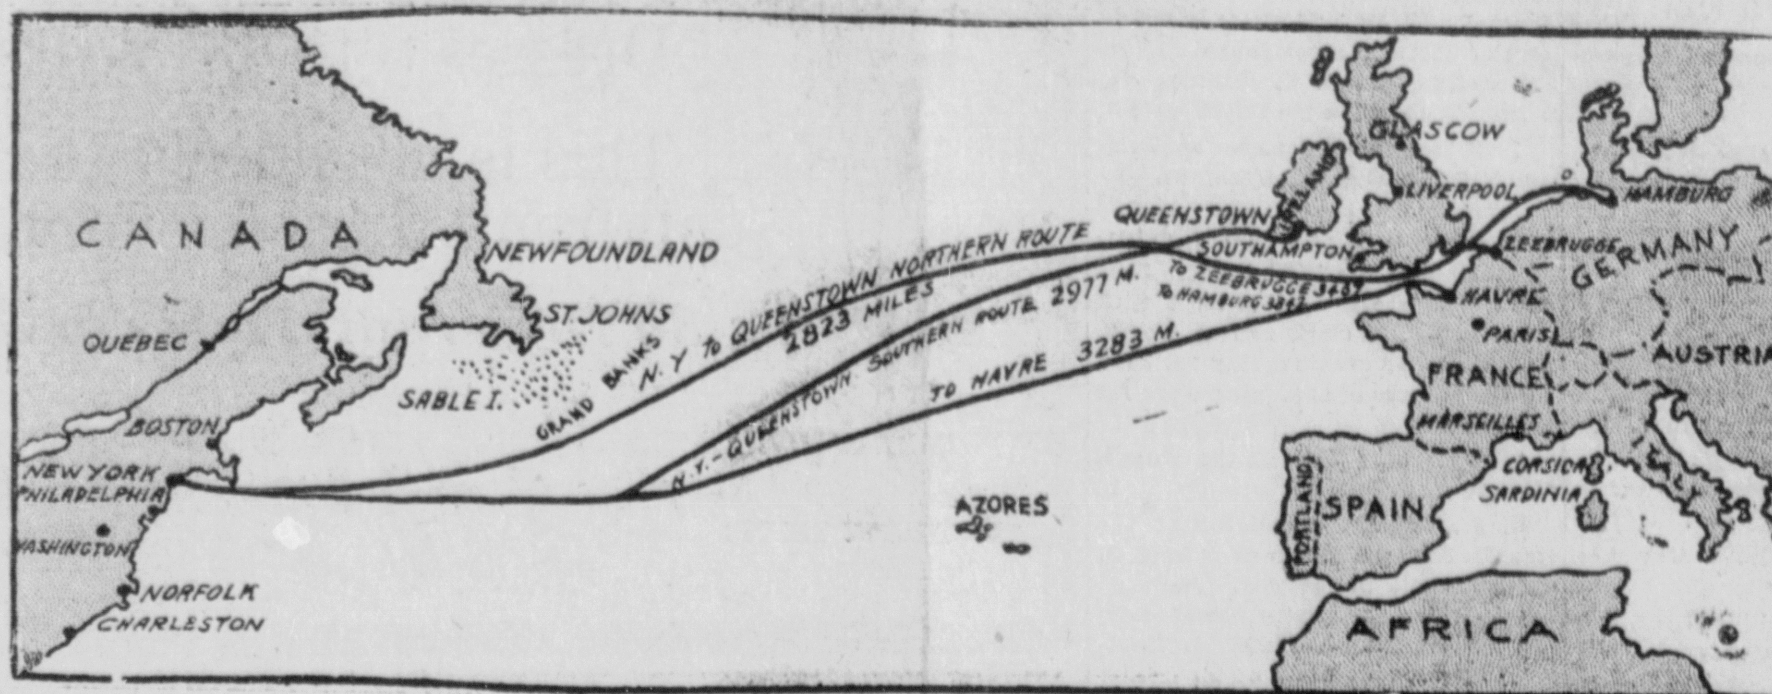

"In Russian Poland the allied forces continue their pursuit of the Russians. The district south of the lower Pilica has been cleared of the enemy.

"In the mountain region from Kielce to the Upper Kamienska we advanced along the Vistula to the heights north of Kilmowbov.

"In the region of Rudnik and Przemysl (Galicia) Russian rear guards repelled from the west of the river bank, losing many prisoners.

"Our armies continue to advance from the wooded Carpathians."

## Lanes of the Great Liners into Which Germany Hopes to Send Submarines

A report has just come that Germany has constructed 200 submarines especially for long voyages to attack vessels traveling from the United States to England and France in case there is trouble between her and the

United States. This map shows the lanes of the great liners and most shipping from the United States to Great Britain. The German submarine base is believed to be Zeebrugge on the Belgian coast. But that point

is a long distance from the open sea west of Ireland. It is considered doubtful if any submarine crew could stand such a long trip.

The assertion that 200 submarines might be sent all the way across

the Atlantic Ocean to attack American shipping in American waters was said by naval officers to be absurd. The E-1 of the American fleet has just made a trip of 1,230 miles from Key West to New York to join the Ameri-

can fleet in the Hudson River. Her crew were worn out when the journey was finished. They might have rebelled had they been forced to go twice that distance, even if they could have survived under the pressure.

## THE TRANSYLVANIA.

Big Cunard Liner Passes Safely Through War Zone.

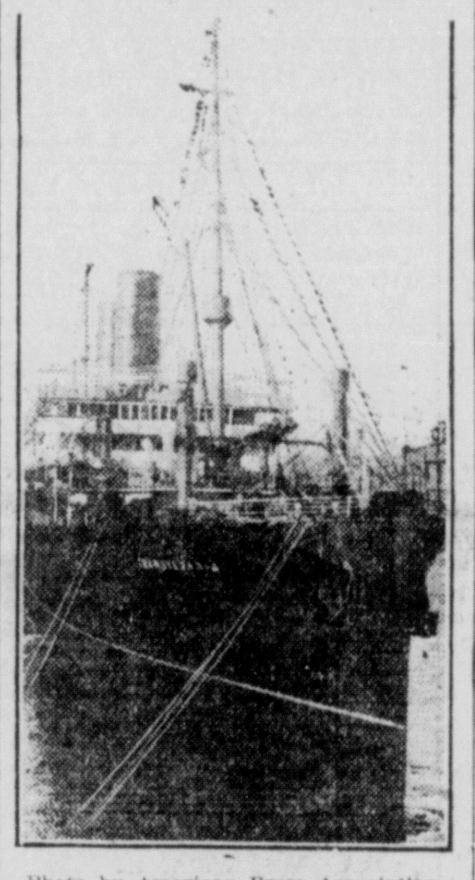

Photo by American Press Association.

## TRANSYLVANIA MAKES PORT

### Anchor Line Steamer Passes Through War Zone.

New York, May 17.—The Anchor line steamer Transylvania passed safely through the war zone about the British Isles and arrived at Greenock, Scotland, it was announced by officials of the Cunard line, to which the Transylvania was under charter.

## AEROPLANE FLOCK DESTROYS ZEPPELIN

### Twenty-seven British Craft Give Mortal Wounds to Airship.

London, May 17.—The story of a duel between a Zeppelin and a squadron of twenty-seven British aeroplanes has reached the Daily Mail by way of Rotterdam.

"This Zeppelin," says the account, "had been frequently seen cruising in the neighborhood of Brussels. About 8 p. m. it was suddenly surrounded and attacked by twenty-seven aeroplanes. The Zeppelin put up a spirited fight with machine guns and tried to escape by rising to a high altitude. But the aeroplanes maneuvered skilfully and gave the bulky airship no chance.

"Within a few minutes the Zeppelin had received several mortal wounds and fell. All the crew of sixty were killed. Two aeroplanes were destroyed by the Zeppelin's guns."

## WILSON BACKED BY SHERMAN

### Illinois Senator Says President Deserves Support.

Springfield, Ill., May 17.—"President Wilson's note to Germany is in accordance with international law and the usages of civilized warfare," was the comment of United States Senator Lawrence V. Sherman. "He deserves the support of all loyal citizens of the United States."

## PRESIDENT WILSON KEEPS IN TOUCH WITH SITUATION

(By United Press)

New York, May 17.—While reviewing the fleet President Wilson has his finger constantly upon the international situation, a wireless station with a special White House operator at the key at the Knickerbocker hotel. Another station is on the Mayflower, and a special wire is in commission from the White House to the hotel.

## GERMANS DRAW LINE NOT BELIEVED CRISIS WILL RESULT

(By United Press)

Berlin, May 17.—It is stated authoritatively that the reply of the German government to the United States note will draw a distinct line between the Gulf of Mexico and the Lusitania, and it is not believed that the reply will precipitate a crisis. It is accepted that the submarine warfare is an act in self defense and its abandonment is not likely. It is believed that the submarines may decide the German issue, and instead they may ask the Americans to use American ships only when traveling. It is believed that while America is friendly the country is blinded by the latitude allowed in self defense.

## KING FAVORS WAR REFUSED RESIGNATION CHEERING FOR WAR

(By United Press)

Rome, May 17.—It is reported that Premier Salandra has summoned the cabinet for immediate session on account of the reports that an Austrian battalion had crossed the Italian frontier, the report saying that the raiders were finally repulsed by a bayonet charge.

A hundred thousand people surged around the war office, royal palace and foreign offices cheering for war. The fact that the king refused to accept the resignation of Premier Salandra is taken to mean that the king favors war.

## GERMANY RECEIVED PROTEST FRIENDLY

(By United Press)

Washington, May 17.—Germany received President Wilson's protest against submarine warfare in a very friendly manner, and the foreign minister treated Ambassador Gerard with utmost courtesy. When read the American proposition as set forth by President Wilson, will have careful and early consideration. Thus Gerard wired to the president at New York. Many letters from German-Americans have been received at the White House pledging support.

## TITANIC CLAIMS

New York, May 17.—Suits against the Oceanic Steam Navigation Co., Ltd., White Star Line, arising out of the loss of the Titanic for claims aggregating upwards of 18,000,000 dollars came up before Judge Mayer in United States district court today upon application of the steamship company to have liability limited to amount of passage money actually paid out to company.

## BRITISH AVIATORS ATTACK ZEPPELINS

(By United Press)

London, May 17.—Dispatches from Downs says that eight English aviators from Dunkirk station attacked and severely damaged the Zeppelins which attacked the English villages. The battle was spectacular and far above the clouds over the English channel. The aviators were subjected to terrific fire from the Zeppelins but escaped injury. The Zeppelins were first attacked by English aviators along the British coast and were driven out to sea near West Hindlight Ships. When these air crafts commenced to appear messages were sent to the aviator station at Dunkirk and biplanes darted to the attack closing in on the Zeppelins and firing at close range, two others went above the Zeppelins and dropped bombs through their gas tanks, clouds of smoke indicating the explosion that followed on the Zeppelin, the report of the officials being that the Zeppelin floated tail downward apparently helpless, and it is believed was lost.

## Reviews Land Parade

(By United Press)

New York, May 17.—President Wilson, accompanied by Secretary of the Navy Daniels, his private secretary Joseph Tumulty and other Washington officials, left the president yacht Mayflower, at 8:30 this morning to review a land parade. The Mayflower arrived at New York yesterday. This is the first event in the big naval celebration scheduled for the next two days.

On the reviewing stand, before the public library on Fifth avenue, the president was met by city officials. After reviewing the officers and jockeys of the Atlantic fleet the presidential party returned to the Mayflower. At 3:30 this afternoon the Mayflower made a tour of the fleet at anchor in the Hudson river.

Tonight at 7:30 o'clock the president will dine on board the battleship Wyoming, with Secretary Daniels and other cabinet members, Mr. Tumulty, Assistant Secretary Roosevelt, Admiral Fletcher, commanding the fleet; commanders of the four divisions, seventeen captains of battleships, Rear Admiral Usher, commandant of the Brooklyn Navy yard, and other naval officers.

At 8:30 o'clock, the big water carnival in connection with the fleet festivities, will be held in the North river. The Mayflower is anchored at 72d street, and the water carnival "fleet" made up of hundreds of floats and pleasure craft, will assemble at 125th street and pass down the river beside the fleet until it reaches the Mayflower, where it will turn back up the river, passing again beside the battleships. The searchlight display during the carnival promises to be wonderful.

Tomorrow the president will review the entire fleet as it passes out to sea. Then the Mayflower will return to Washington.

## NEW GOVERNMENT FORMED

(By United Press)

Lisbon, May 17.—The city is reported normal, the new government starting this morning.

## GERARD NOTIFIED STATE DEPARTMENT

(By United Press)

Washington, May 17.—Ambassador Gerard this morning formally notified the state department that he had delivered the United States note to the German ambassador. No details accompanied the statement.

## THE TRANSYLVANIA TOOK NORTH ROUTE

(By United Press)

Glasgow, May 17.—The Transylvania, carrying 900 passengers took the north route, escaping the submarines and arrived safely this morning.

Until this morning no word had been heard from the Transylvania since she left New York May 7th.

## Disapproved Plans

(By United Press)

Washington, May 17.—The Interstate Commerce Commission this morning disapproved the plans suggested by the western railroads for rates to the Pacific coast and intermediate back haul points.

## Zeppelin Crippled

(By United Press)

London, May 17.—The admiralty officially state that they have good reason to believe the Zeppelin that raided Ramsgate this morning was severely damaged.

## TO STOP AUSTRIANS IN FLIGHT

(By United Press)

Winnipeg, May 17.—The Canadian authorities have decided not to send Canadian soldiers to the United States border on account of the unemployed Austrians attempting to enter the states. It is cited that the men are helpless on account of lack of food and clothing. There were 900 in the party when it started, but 500 have fallen by the wayside and the others are starving. Inspector Carr, U. S. immigration agent, went to the border this morning to direct the armed deputies. However, on account of the helplessness of the Austrians a clash is unexpected.

## NOT THE GERMAN CRUISER KARLSRUHE

(By United Press)

Washington, May 17.—The reports that the German cruiser Karlsruhe had arrived at Newport or plying the cape is definitely denied, no details are furnished but it believed to be mistaken identity. The vessel reported to be off Old Point is a three stacker while the Karlsruhe is a four stacker. The dispatches state that the vessel approaching does not answer the description of the Karlsruhe.

## COURT CANCELS PATENTS

(By United Press)

Washington, May 17.—The supreme court this morning affirmed the court of appeals in its ruling cancelling five patents of Oregon land held by the Booth Kelley Lumber company because the initial application made was fraudulent.

## SENATOR SHERMAN.

Asserts President is Deserving of Support.

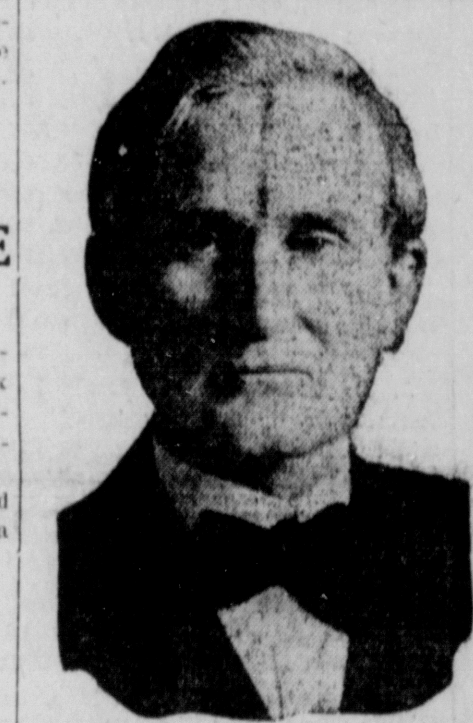

Photo by American Press Association.

## CALLS ATTENTION TO THINNING RANKS

### Minnesota Governor Names May 31 Memorial Day.

St. Paul, May 17.—Governor Hammond issued his Memorial day proclamation setting aside May 31 as a legal holiday. He suggests that between 12 m. and 12:05 p. m., the bells of the city be tolled in honor of the soldier dead and that all persons stand uncovered during that period. The proclamation follows, in part:

"With each succeeding year the ranks of the Grand Army of the Republic grow thinner; those men who, more than half a century ago took up arms—not for the purpose of conquest, but to preserve a government founded upon the theory that all men are created equal—are one by one passing beyond.

"It is but proper that we who are the heirs of their heroic deeds should set apart a day on which to show our appreciation of the worth of their labor and to strew upon their last resting places flowers as tokens of sweet remembrance.

"We behold today one-half of the world drenched in blood in the greatest and most cruel war of history and a silent tribute of respect—five minutes of memories—cannot do otherwise than call to our minds the cruelties of war and the blessings of peace.

"It is fitting that we should join our fellow citizens in an appropriate memorial to our patriotic dead; therefore I, Winfield S. Hammond, governor of Minnesota, hereby designate Monday, May 31, 1915, to be a public holiday and ask that the day be observed in a becoming manner."

May 31 is designated for the observance because May 30 falls on Sunday.

## REICHSTAG IS TO CONVENE

### Berlin Papers Say German Congress Will Meet May 18.

Amsterdam, May 17.—Berlin papers say that the reichstag will reconvene May 18, probably for three or four days' work.

## HEAVY FIGHTING ALONG LONG LINE

### French and British Claim Partial Successes.

## GERMAN REPORT DIFFERENT

### Teutons Assert Attacks Generally Result in Failure.

Paris, May 17.—The following official communication was issued by the war office:

"We repulsed with complete success a fourth German counter attack at Steenstraete. We have conserved all the positions won and consolidated our gain, the importance of which is emphasized by the violent efforts of the enemy.

"Further to the south the British troops inflicted on the Germans a serious check and carried to the southwest of Richebourg l'Avoue, a kilometer (two-thirds of a mile) of trenches. At the same time to the northwest of Festubert they took possession of 500 meters of trenches.

"This second attack was later pushed in the direction of Quenque street, and with a front of 600 meters, resulting in a gain of 500 meters, in which the number of German losses was very heavy. The advance of the British troops continues.

"In the sector to the north of Arras we have carried out diverse actions with a view to consolidating our new front. In driving out the enemy from several points, where they were still holding on, our troops gave proof in the struggle, foot by foot, of great tenacity.

## Explode German Balloon.

"We gained 200 meters on the slope which descends from the plateau of Lorette, near the Sugar refinery of Souchez. We have carried some additional houses in the northern part of Neuville, exploded a German balloon to the east of Vimy and our aviators have bombarded the station of Somaen.

"In Champagne, to the northwest of Ville-Sur-Tourbe, an action of a purely local nature has given to us a very brilliant success.

"The enemy exploded a mine behind our first line. Eight German companies immediately precipitated themselves on our positions and they gained a foothold in one salient. We immediately delivered a counter attack and retook part of the lost ground, taking seventy-seven prisoners, of whom three were officers.

"We delivered a counter attack which was carried out with much spirit with the bayonet and hand grenades and resulted in our recapture of all of the positions.

"The enemy has suffered enormous losses—a fact which has been established by us for certainty in the trenches and on the parapets. We have, in fact, found more than 1,000 German dead and we have, in addition, captured 300 prisoners, including nine officers, and taken six machine guns. Thus almost all of the attacking force remained either in our hands or on the ground."

## COST OF AIDING BELGIANS

### Will Reach Sixty-five Million Dollars in August.

London, May 17.—The American Commission for Relief in Belgium will have provided foodstuffs to the value of about \$65,000,000 for the Belgian people by the middle of August. Charitable contributions from America will have amounted to about \$5,000,000 and from other centers of the world approximately the same total. The great bulk of the food supplies, representing the remaining \$55,000,000, is being provided indirectly by the Belgian people themselves. Fully 75 per cent of the Belgian people are being supplied with food by the commission without recourse to charity.

## AUDITOR PREPARES TABLE

### Figures Show Minnesota Legislative Appropriations.

St. Paul, May 17.—The 1915 Minnesota legislature appropriated a total of \$18,019,503.60, according to a table prepared by J. A. O. Preus, state auditor.

This is \$1,064,654.97 less than the 1913 appropriations and \$492,699.73 less than the total for 1911. The figures for 1913 are \$19,084,168.57 and for 1911, \$18,512,203.33.

In his inaugural address Governor Hammond urged that legislative appropriations be reduced to the 1911 level and the auditor's comparative statement shows that not only was this accomplished, but that nearly \$500,000 more was lopped off.

Teutons Assert Attacks Generally Result in Failure.

Paris, May 17.—The following official communication was issued by the war office:

"We repulsed with complete success a fourth German counter attack at Steenstraete. We have conserved all the positions won and consolidated our gain, the importance of which is emphasized by the violent efforts of the enemy.

"Further to the south the British troops inflicted on the Germans a serious check and carried to the southwest of Richebourg l'Avoue, a kilometer (two-thirds of a mile) of trenches. At the same time to the northwest of Festubert they took possession of 500 meters of trenches.

"This second attack was later pushed in the direction of Quenque street, and with a front of 600 meters, resulting in a gain of 500 meters, in which the number of German losses was very heavy. The advance of the British troops continues.

"In the sector to the north of Arras we have carried out diverse actions with a view to consolidating our new front. In driving out the enemy from several points, where they were still holding on, our troops gave proof in the struggle, foot by foot, of great tenacity.

### Explode German Balloon.

"We gained 200 meters on the slope which descends from the plateau of Lorette, near the Sugar refinery of Souchez. We have carried some additional houses in the northern part of Neuville, exploded a German balloon to the east of Vimy and our aviators have bombarded the station of Somain.

"In Champagne, to the northwest of Ville-sur-Tourbe, an action of a purely local nature has given to us a very brilliant success.

"The enemy exploded a mine behind our first line. Eight German companies immediately precipitated themselves on our positions and they gained a foothold in one salient. We immediately delivered a counter attack and retook part of the lost ground, taking seventy-seven prisoners, of whom three were officers.

"We delivered a counter attack which was carried out with much spirit with the bayonet and hand grenades and resulted in our recapture of all of the positions.

"The enemy has suffered enormous losses—a fact which has been established by us for certainty in the trenches and on the parapets. We have, in fact, found more than 1,000 German dead and we have, in addition, captured 300 prisoners, including nine officers, and taken six machine guns. Thus almost all of the attacking force remained either in our hands or on the ground."

## COST OF AIDING BELGIANS

Will Reach Sixty-five Million Dollars in August.

London, May 17.—The American Commission for Relief in Belgium will have provided foodstuffs to the value of about \$65,000,000 for the Belgian people by the middle of August. Charitable contributions from America will have amounted to about \$5,000,000 and from other centers of the world approximately the same total. The great bulk of the food supplies, representing the remaining \$55,000,000, is being provided indirectly by the Belgian people themselves. Fully 75 per cent of the Belgian people are being supplied with food by the commission without recourse to charity.

## AUDITOR PREPARES TABLE

Figures Show Minnesota Legislative Appropriations.

St. Paul, May 17.—The 1915 Minnesota legislature appropriated a total of \$18,019,503.60, according to a table prepared by J. A. O. Preus, state auditor.

This is \$1,064,654.97 less than the 1913 appropriations and \$492,699.73 less than the total for 1911. The figures for 1912 are \$19,084,168.57 and for 1911, \$18,512,203.33.

In his inaugural address Governor Hammond urged that legislative appropriations be reduced to the 1911 level and the auditor's comparative statement shows that not only was this accomplished, but that nearly \$500,000 more was lopped off.

May 19-20. 1f  
O. H. Johnson, proprietor of the  
Ransford hotel has returned from an  
extensive trip in the east. He came  
back with no car, saying the automo-  
bile story was an invention originat-  
ing in the fertile brain of his friend,  
W. H. Cleary. In the east Mr. John-  
son saw a great transformation, a re-  
vival in business which took one by  
surprise. Pittsburgh was a perfect  
hive of industry, factories working  
overtime to fill their numerous orders.  
At his old home in Cleveland,  
Ohio and Buffalo, N. Y., there was al-  
so much work in all lines of industry.  
Mr. Johnson visited a sister in Ober-  
lin, Ohio. He saw the noted Hans  
Wagner play two games. In one  
game Honus accepted 18 chances at  
shortstop and missed not a one. He  
scouted them all in. Crops are well  
advanced in the east. Apple trees  
are doing finely.

**Danger to Children**  
Serious illnesses often result from  
lingering coughs and colds. The  
hacking and coughing and disturbed  
sleep rack a child's body and the  
poisons weaken the system, so that  
disease cannot be thrown off. Foley's  
Honey and Tar Compound has eased  
coughs, colds and croup for three  
generations; safe to use and quick to  
act. There is no better medicine for  
croup, coughs and colds. For sale by  
H. P. Dunn, druggist.—Adv. mwf

**When the Band Played "Dixie."**  
One of the bands in a recent Me-  
morial day parade in Chicago started  
up "Dixie." The tune didn't catch the  
ears of the crowd at first. A negro  
"mammy" who was selling hot tamales  
was the first to notice it. Snatching  
her handkerchief from a mysterious  
pocket, she began to cheer. The Phil-  
ippine veterans in their khaki suits  
came marching by.  
"Do you remember, Bill," asked  
"Felix," "how the Rizal orchestra used  
to play that down in the old Luzon  
cafe when we were just back from the  
provinces?"  
"We used to stand up on the table,  
didn't we?" said Bill.  
Then, with a shout, the khaki troops  
joined in the chorus. A group of Japa-  
nese boys caught the inspiration of the  
song and waved their handkerchiefs.  
The veterans down the long line be-  
gan to cheer. The little southern boy  
in gray whose grandfather had been  
"also a veteran" tossed his cap into  
the air.  
"That tune makes the north and  
south one, doesn't it, mother?" he  
asked.  
And his mother bent down and kiss-  
ed him on the forehead.

**THE RETURN OF THE  
COLORS.**  
The return of Confederate flags  
captured by Union soldiers is an-  
other strand to bind together the  
north and the south in an un-  
broken union. There were some  
who thought that all the oppos-  
ing regimental flags should have  
been buried with the honors of  
war at the close of the conflict,  
nevermore to have a resurrec-  
tion. But they have been kept,  
and now the Union soldier thinks  
fondly of his own colors, rent  
and stained, hanging in shreds  
and patches, but still the royal  
emblems of glory and ultimate  
victory. Let him see them, and  
he will press them to his lips  
and rain tears of joy upon their  
tattered folds. His heart inter-  
prets the feelings of his Confed-  
erate comrade who fought so  
gallantly under the standards he  
had surrendered in battle.—Bish-  
op Fallows.

**Literary.**  
Dickcy was just beginning to write  
compositions, when he produced his  
first literary review:  
"My mother reads to me every night  
before I go to bed. I like the stories  
that my mother reads to me before I  
go to bed. Of all the stories that she  
reads I like 'Pilgrim's Progress' the  
best. He had a hard time, but he got  
by."—New York Post.

**On  
Memorial  
Day**  
THERE'S a thrill and a throb in the  
air today,  
A throb and a thrill ever new,  
For billows have broken o'er wall and  
town  
Of red and of white and of blue.  
The blood runs swift and a shrill huzza  
Springs glad to the lips of youth,  
While louder the silence speaks of those  
Who fought, dear God, for thy truth.  
It floats up the aisles of the village  
church;  
It springs from the statehouse dome;  
It kisses the breeze wherever it please,  
Set firm in the heart of the home.

**EVOLUTION OF THE CHAIR.**  
Benches Without Backs Served For  
Seats in the Middle Ages.  
It seems odd to contemplate that,  
with the multitude of chairs to be  
found in every home these days, once  
upon a time there were no chairs as  
we know them in any home. In those  
days benches answered the purpose  
now served by chairs, and when a fam-  
ily drew up to the table for its meals  
in the middle ages they sat on long  
benches, which had no support for the  
backs, instead of chairs.  
From long ago there were heavy  
throne on which the rulers sat, but  
these throne chairs were so heavy that  
they could not be easily moved. Later  
the benches were given a back, and  
still later the chairs as we know them  
today were evolved.  
It was not until 1000, in the time of  
Charles I., that the average English-  
man knew of chairs or had them in his  
house, according to those who have  
made a study of furniture. The first  
English chairs were imported from  
France, and the native cabinetmakers  
and carpenters made chairs in imi-  
tation of these.  
In those days the fashion in chairs  
changed with the fashion of clothes.  
When full skirts were the style the  
chairs became wider, so that milady  
and her skirts could be accommodated  
on one chair. The difference in the  
size of chairs that we have today,  
made in imitation of old styles, comes  
from this difference in clothes.—Lon-  
don Standard.

**TEMPTATION.**  
"Fight today's temptation as it  
comes" is good advice. And if it  
seems to be only trifling fight it the  
harder.  
Naturally.  
First Student—What is a groundhog?  
Second Student—Sausage, I suppose.—  
Cornell Widow.

**Work Has Been Done.**  
Howell—You can't make a monkey  
out of me. Powell—No. You seem to  
have already awarded the contract.

**GOOD CATCHERS.**  
They Must Be Quick Thinkers and Are  
Hard to Develop.  
Good fielders and hard hitters there  
are who are not quick witted, but never  
a catcher, who is the first to see  
signs of weakness in the pitcher and  
sends word to the bench for another  
pitcher to warm up. Three years' ex-  
perience with a major league is re-  
garded as necessary to make a catcher  
competent. Only a few continue  
long enough to have such experience.  
Good catchers say that when they  
hear the ball touch the bat their hands  
instantly fly toward the ball, no mat-  
ter where it glances off the bat. Some  
after losing sight of a fly in the sun  
have the ability to reach it neverthe-  
less.  
Some catchers are unjustly blamed  
for not putting a runner out who gets  
a big lead off the pitcher, who is re-  
ally at fault. Here not only a good  
throw will fail, but it is often useless  
to throw at all.  
Good catchers make many unexpect-  
ed throws. They must throw from an  
unnatural position and with a jerky  
motion of the arm. Archer threw with  
a snap of the arm while standing flat  
footed and put many out on first base.  
The catcher signals second baseman  
that he is going to throw the next  
pitched ball to him; the pitcher deliv-  
ers it a little to one side so that it  
can be handled easily; the shortstop  
knows the next ball will not be hit and  
so can back up second base. This un-  
expected throw often puts the runner  
out on second.  
A similar play is when the runners  
move up every time the ball is pitch-  
ed. If those on second and third both  
get well off the bags the catcher again  
signals the pitcher to waste a ball and  
makes as if he were going to throw  
to third, but instead throws quickly to  
second and retires the runner there,  
or makes as if he were going to throw  
to second, but instead throws just be-  
yond the pitcher, when the baseman  
starts for second, and he, without stop-  
ping, runs up, catches the ball and  
sends it home to retire the man seek-  
ing to score.—Arthur MacDonald in  
American Education Review.

May2-10-17

**Why a Whip "Cracks."**  
In a lecture on "Mechanics in the  
Home" delivered to boys at the Royal  
Institution, in London, Professor C. V.  
Boys tried to explain why a whip  
cracks. The Scientific American re-  
marks that his explanation was only  
tentative, and the greatest authorities  
on dynamics have been at a loss to  
give the reason. Briefly, it has to do  
with the fact that, owing to the ac-  
tion of centrifugal and other forces,  
the speed at which the whip travels  
throughout the length of its lash and  
so great at the end that it comes up to  
the velocity of sound.  
**Mimicking Death.**  
Sarah Bernhardt's fondness for play-  
ing death scenes (you remember her  
habit of sleeping in a coffin) made her  
an object of terror to the ex-Sultan Ab-  
dul Hamid. When the great actress  
visited Constantinople years ago Abdul  
refused absolutely to see her or wit-  
ness her playing, declaring that he had  
no wish to come in contact with a wo-  
man who could mimic death to such  
perfection.—London Chronicle.  
**True, but Misleading.**

O. H. Johnson, proprietor of the  
Ransford hotel has returned from an  
extensive trip in the east. He came  
back with no car, saying the automo-  
bile story was an invention originat-  
ing in the fertile brain of his friend,  
W. H. Cleary. In the east Mr. John-  
son saw a great transformation, a re-  
vival in business which took one by  
surprise. Pittsburgh was a perfect  
hive of industry, factories working  
overtime to fill their numerous orders.  
At his old home in Cleveland,  
Ohio and Buffalo, N. Y., there was al-  
so much work in all lines of industry.  
Mr. Johnson visited a sister in Ober-  
lin, Ohio. He saw the noted Hans  
Wagner play two games. In one  
game Honus accepted 13 chances at  
shortstop and missed not a one. He  
scouted them all in. Crops are well  
advanced in the east. Apple trees  
are doing finely.

**Danger to Children**

Serious illnesses often result from  
lingering coughs and colds. The  
hacking and coughing and disturbed  
sleep rack a child's body and the  
poisons weaken the system, so that  
disease cannot be thrown off. Foley's  
Honey and Tar Compound has eased  
coughs, colds and croup for three  
generations; safe to use and quick to  
act. There is no better medicine for  
croup, coughs and colds. For sale by  
H. P. Dunn, druggist.—Adv. mwf

When the Band Played "Dixie."  
One of the bands in a recent Mem-  
orial day parade in Chicago started  
up "Dixie." The tune didn't catch the  
ears of the crowd at first. A negro  
"mammy" who was selling hot tamales  
was the first to notice it. Snatching  
her handkerchief from a mysterious  
pocket, she began to cheer. The Phil-  
ippine veterans in their khaki suits  
came marching by.

"Do you remember, Bill," asked  
"Flea," "how the Rizal orchestra used  
to play that down in the old Luzon  
cave when we were just back from the  
provinces?"

"We used to stand up on the table,  
didn't we?" said Bill.

Then, with a shout, the khaki troops  
joined in the chorus. A group of Japa-  
nese boys caught the inspiration of the  
song and waved their handkerchiefs.  
The veterans down the long line be-  
gan to cheer. The little southern boy  
in gray whose grandfather had been  
"also a veteran" tossed his cap into the  
air.

"That tune makes the north and  
south one, doesn't it, mother?" he  
asked.

And his mother bent down and kiss-  
ed him on the forehead.

\*\*\*\*\*  
**THE RETURN OF THE**  
**COLORS.**

The return of Confederate flags  
captured by Union soldiers is an-  
other strand to bind together the  
north and the south in an un-  
broken union. There were some  
who thought that all the oppos-  
ing regimental flags should have  
been buried with the honors of  
war at the close of the conflict,  
nevermore to have a resurrection.  
But they have been kept, and  
now the Union soldier thinks  
fondly of his own colors, rent  
and stained, hanging in shreds  
and patches, but still the royal  
emblems of glory and ultimate  
victory. Let him see them, and  
he will press them to his lips  
and rain tears of joy upon their  
tattered folds. His heart inter-  
prets the feelings of his Confed-  
erate comrade who fought so  
gallantly under the standards he  
had surrendered in battle.—Bish-  
op Fallows.

\*\*\*\*\*  
**Literary.**

Dicky was just beginning to write  
compositions, when he produced his  
first literary review:

"My mother reads to me every night  
before I go to bed. I like the stories  
that my mother reads to me before I  
go to bed. Of all the stories that she  
reads I like 'Pilgrim's Progress' the  
best. He had a hard time, but he got  
by."—New York Post.

THE STORE OF QUALITY

SEE OUR  
WINDOWS

**GOOD CATCHERS.**

They Must Be Quick Thinkers and Are  
Hard to Develop.

Good fielders and hard hitters there  
are who are not quick witted, but never  
a catcher, who is the first to see  
signs of weakness in the pitcher and  
sends word to the bench for another  
pitcher to warm up. Three years' ex-  
perience with a major league is re-  
garded as necessary to make a catcher  
competent. Only a few continue  
long enough to have such experience.

Good catchers say that when they  
hear the ball touch the bat their hands  
instantly fly toward the ball, no mat-  
ter where it glances off the bat. Some  
after losing sight of a fly in the sun  
have the ability to reach it neverthe-  
less.

Some catchers are unjustly blamed  
for not putting a runner out who gets  
a big lead off the pitcher, who is re-  
ally at fault. Here not only a good  
throw will fail, but it is often useless  
to throw at all.

Good catchers make many unexpect-  
ed throws. They must throw from an  
unnatural position and with a jerky  
motion of the arm. Archer threw with  
a snap of the arm while standing flat  
footed and put many out on first base.

The catcher signals second baseman  
that he is going to throw the next  
pitched ball to him; the pitcher deliv-  
ers it a little to one side so that it  
can be handled easily; the shortstop  
knows the next ball will not be hit and  
so can back up second base. This un-  
expected throw often puts the runner  
out on second.

A similar play is when the runners  
move up every time the ball is pitched.  
If those on second and third both  
get well off the bags the catcher again  
signals the pitcher to waste a ball and  
makes as if he were going to throw to  
third, but instead throws quickly to  
second and retires the runner there,  
or makes as if he were going to throw  
to second, but instead throws just be-  
yond the pitcher, when the baseman  
starts for second, and he, without stop-  
ping, runs up, catches the ball and  
sends it home to retire the man seek-  
ing to score.—Arthur MacDonald in  
American Education Review.

"UNTIL THE CHILDREN WE TELL THE  
TALE."

And all through the hours the incense  
of flowers,  
Of prayers and of praise is swung  
From a censer of gold that the children  
hold  
While the storied past is sung.

The censer is memory's storied urn  
That holdseth for love and rue  
The ashes of those whom each heart  
knows  
Fought for the gray or the blue.

Fewer each year as the end draws near,  
When none will be left, not one,  
Who saw the sorrowful sights of war  
Or shared in the brave deeds done.

But unto the children we tell the tale,  
And once in each twelvemonth long  
We honor the men who died for us  
When the goodly land went wrong.  
—Selected.

The Chemist Dumas and Chlorine.  
The guests at a ball given at the  
Tulleries, Paris, were once distressed  
by something in the air which irritated  
everybody. The most famous chemist  
of the day was consulted as to the  
mysterious cause. His son-in-law, Du-  
mas, had the happy thought that per-  
haps the irritating particles in the air  
came from the wax candles. He found  
on analysis that these candles had  
been bleached by chlorine. Immedi-  
ately they were lighted a compound was  
added to the air that irritated throats  
and noses. This chance discovery led  
Dumas to study the whole effect of  
chlorine, with far-reaching results in  
chemistry.

**EVOLUTION OF THE CHAIR.**

Benches Without Backs Served For  
Seats in the Middle Ages.

It seems odd to contemplate that,  
with the multitude of chairs to be  
found in every home these days, once  
upon a time there were no chairs as  
we know them in any home. In those  
days benches answered the purpose  
now served by chairs, and when a fam-  
ily drew up to the table for its meals  
in the middle ages they sat on long  
benches, which had no support for the  
backs, instead of chairs.

From long ago there were heavy  
thrones on which the rulers sat, but  
these throne chairs were so heavy that  
they could not be easily moved. Later  
the benches were given a back, and  
still later the chairs as we know them  
today were evolved.

It was not until 1600, in the time of  
Charles I., that the average English-  
man knew of chairs or had them in his  
house, according to those who have  
made a study of furniture. The first  
English chairs were imported from  
France, and the native cabinetmakers  
and carpenters made chairs in imita-  
tion of these.

In those days the fashion in chairs  
changed with the fashion of clothes.  
When full skirts were the style the  
chairs became wider, so that milady  
and her skirts could be accommodated  
on one chair. The difference in the  
size of chairs that we have today,  
made in imitation of old styles, comes  
from this difference in clothes.—Lon-  
don Standard.

**TEMPTATION.**

"Fight today's temptation as it  
comes" is good advice. And if it  
seems to be only trifling fight it the  
harder.

Naturally.

**Why a Whip "Cracks."**

In a lecture on "Mechanics in the  
Home" delivered to boys at the Royal  
Institution, in London, Professor C. V.  
Boys tried to explain why a whip  
cracks. The Scientific American re-  
marks that his explanation was only  
tentative, and the greatest authorities  
on dynamics have been at a loss to  
give the reason. Briefly, it has to do  
with the fact that, owing to the ac-  
tion of centrifugal and other forces,  
the speed at which the whip travels  
throughout the length of its lash and  
so great at the end that it comes up to  
the velocity of sound.

**Mimicking Death.**

Sarah Bernhardt's fondness for play-  
ing death scenes (you remember her  
habit of sleeping in a coffin made her  
an object of terror to the ex-Sultan Ab-  
dul Hamid. When the great actress  
visited Constantinople years ago Abdul  
refused absolutely to see her or wit-  
ness her playing, declaring that he had  
no wish to come in contact with a wo-  
man who could mimic death to such

## WOMAN'S REALM

### MISS MARIE CLARK HEARD IN RECITAL

Student of Department of Dramatic Expression, Conservatory of Saint Cecilia, Winona

### WILL GRADUATE THIS MONTH

Mr. and Mrs. D. M. Clark, of This City Attended the Recital on Saturday Afternoon

Miss Marie Clark, daughter of Mr. and Mrs. D. M. Clark, of this city, gave a dramatic recital Saturday afternoon, May 15, at the Conservatory of Saint Cecilia, Winona, where she is a student of the department of dramatic expression. She was assisted by Miss Florence McLeod, soprano. The program given included:

Part I.  
"To the Lions".....Brooks  
Arranged from a "Son of Issachar"  
"Knee Deep in June".....Riley  
Miss Clark

Songs:  
"All on a Summer's Day".....Needham  
"Grand Valse".....Arditi  
Miss McLeod

Part II.  
"Japanese Fantasy".....Farrah  
Monologue  
"Cherry Blossoms".....Stephen  
Miss Clark

Miss Clark expects to graduate from the conservatory on May 31.

### GRADUATING EXERCISES

Of Teachers Training Class, Daggett Brook Union Sunday School on Sunday, May 16

Graduating exercises of the Teachers Training class of the Daggett Brook Union Sunday school were held Sunday, May 16, at the Daggett Brook Union church.

Rev. Walter J. Smith presided at the ceremonies. The program included a song service, scripture reading and invocation, address by Mrs. Henry Olson, vocal solo by Miss Anna Michaelson, address by Rev. Walter J. Smith, address by Dr. Joseph Nicholson and the presentation of diplomas.

The members of the graduating class were Mrs. Burpee Sewell, Mrs. Ole Anderson, Miss Ivy Anderson, Miss Minnie Fox, Miss Lois Anderson, Claud Shannon and Elmer Peterson.

The class motto was "Christ Our King." The class colors were royal purple and white. The class flower was the purple iris.

A large attendance was present at the graduation exercises and every number of the program was well carried out.

### Young Peoples Meeting

The Young Peoples society of the Norwegian-Danish Lutheran church will meet at Mr. and Mrs. Anton Shoffo, 1168 Oak Street, Southeast on Tuesday evening, May 18.

### Women's Relief Corps

The ladies of the Women's Relief Corps are giving a benefit entertainment at the Empress theatre tonight, the funds to go toward the G. A. R. fund.

### Lucky Jade.

Since early times the idea has existed in China that a cup made of jade gave health to him who drank it and naturally would counteract a poison. Indeed, the faintest drop of poison was supposed to cause the liquid in which it lay hidden to foam up when brought in contact with jade. Emperors, princes, governors and others who were exposed to the underhand attacks of rivals would, of course, give high prices for cups of jade. In China jade is preeminently the lucky stone, so that a scepter carved out of it is one of the gifts the emperor of China is apt to make to a man whom he wishes to honor.

### Luminous Pictures.

Luminous is a process by which pictures are made of translucent colored papers applied in different thicknesses to glass, the light behind them pouring through them and adding realism to the effect. The principle is not unlike that used by makers of a certain kind of glass window in which the effect is secured by different layers or platings of glass. The advantage of the paper method lies, of course, entirely in its comparative cheapness. The use of oiled paper as a substitute for colored glass is an old device. It only remained to apply technical skill to the making of designs and working them out in this medium.—New York Times.

### Steps to the Presidency.

"Pa," said little George, "I've chopped down your favorite cherry tree."  
"That's a good start toward the presidency, son," responded wise Mr. Washington. "Now split it into rails."  
—Pittsburgh Post.

### '1915 FROLICS' AT THE GRAND

Program for Wednesday Evening, May 19th, Solos and Chorus Numbers to be Given

### NEW PROGRAM ON THURSDAY

Given for the Benefit of St. Paul's Episcopal Church, Direction Mrs. C. E. Parker

"The 1915 Frolics" will be given at the Grand theatre on Wednesday and Thursday evenings, under the direction of Mrs. Clyde E. Parker for the benefit of St. Paul's Episcopal church. There will be a different program each night. The Wednesday evening program is:

1. Reel of pictures.
2. Song, "Come on Over Here," by Miss Esther Bellmuth and Werner Hemstead, Jr.
3. Song, "Wrap Me in a Bundle," by the Misses Edna Mahlum, Eleanor Anderson, Lillian Irwin, Anna Erickson, and Florence Carroll.
4. Dance, "Tipperary Trot" by Miss Esther Bellmuth and Ben Olson.
5. Two reel picture.
6. Song, "Prunella Mine," by Miss Vivian Reilly and Werner Hemstead, Jr. Chorus the Misses Lillian Irwin, Dorothy Baker, Margaret Day, Madge Murphy, Helen Kiebler, Frances Quinn, Ida Reid and Marguerite Quinn.
7. Violin solo by Edwin Harris Bergh, accompanist Mrs. Clyde Parker.
8. Song, "Simple Melody," two pianos, Miss Frances Quinn and Mrs. Clyde E. Parker. Soloists Miss Vivian Reilly and Al Mraz. Chorus, the Misses Lillian Irwin, Dorothy Baker, Margaret Day, Madge Murphy, Helen Kiebler, Frances Quinn, Ida Reid and Marguerite Quinn; Messrs Eugene White, Werner Hemstead, Jr., Ben Olson, John Gavin, Kirke Smith, Lamont Kopp, Walter Kopp and Milton Mahlum.

Mrs. Clyde E. Parker and Edwin Harris Bergh will accompany each number. On Thursday evening there will be an entire change of program.

### PERSONAL MENTION

Mrs. T. E. Cole, of Deerwood, was a Brainerd visitor today.

Mrs. T. E. Cole, of Deerwood, was a Brainerd visitor today.

Mrs. Luis Knudsen, who has been visiting in Superior, Ws., returned home this noon.

Miss Leona Gordon, guest of her friend, Miss Gertrude Smith, returned this afternoon to her home in Little Falls.

Miss Florence Bemish, of Winnipeg, Canada, the guest of friends in the city for the week-end, went to New York city this afternoon.

The retail clerks union elected Miss Agnes S. Sundine a delegate to the national convention at Milwaukee, Wis., which meets there in August.

Miss Cathleen Caulfield spent Sunday the guests of her parents in this city, coming from Duluth, where she is taking a course as trained nurse at St. Mary's hospital.

Miss Jessie Peterson of Brainerd, who has been the guest of Mr. and Mrs. Hans Mosen, went to Brainerd yesterday afternoon and visited friends, returning to Bemidji in the evening.—Bemidji Pioneer.

### WILSON VISITS NEW YORK

President Will Review the Great Atlantic Fleet.

New York, May 17.—President Wilson, on board the naval yacht Mayflower, reached New York.

Before the president's arrival arrangements had been completed for the review of the Atlantic fleet, which promises to be one of the greatest naval spectacles ever held in the United States.

Indications that a notable welcome was in store for the president were found among the crowds that flooded the warships of the fleet in the Hudson river. Keen interest in his movements was manifest among them.

### An Effectual Cure.

"She wants to be a sister to me."  
"You can easily get her out of that notion."  
"How?"  
"Treat her as you would a sister."  
—Kansas City Journal.

### WILL ENTER THE MINISTRY

Walter H. Northrup, for Six Years in Postoffice, Leaves Brainerd on Tuesday Night

### GOES TO MILAN, WASHINGTON

To Become a Minister of the Evangelical Faith, Converted Year Ago at Tabernacle

Converted a year ago at the tabernacle revival meetings, Walter H. Northrup, one of the best known letter carriers and later clerk at the postoffice, has given up his position in Brainerd and leaves Tuesday midnight with his family for Milan, Wash., where he takes up church work and after five years study expects to become a regularly ordained minister of the Evangelical faith.

He joined the Evangelical church of Northeast Brainerd a year ago and since then took an active part in church and Sunday school work. He was president of the Young Peoples Alliance, assistant superintendent of the Sunday school and also taught the young men's Bible class.

He had been connected with the postal service in Brainerd the past six years. Five years of that time he was a letter carrier, delivering mail on the south side and making friends of all his patrons. He was as steady as a clock. The last year he has been a clerk in the postoffice.

Mr. Northrup is married and his family circle includes wife and three children. Mr. and Mrs. Northrup have made their home in Brainerd the last 14 years, living in Southeast Brainerd. The oldest child, Lois, aged 7, will stay with her grandmother in Brainerd, Mrs. J. H. Northrup, for some time.

Milan is situated about 25 miles north of Spokane, Wash. The district is under supervision of Rev. A. Zabel, of this city, recently promoted from the Brainerd field to his larger activities in Washington.

The many friends of Mr. and Mrs. Northrup wish them prosperity and success in their new home and all believe that the quiet, intense application of Mr. Northrup will result in his reaching the coveted goal in the ministry.

### Different Circumstances.

Hampton—Last week a doctor told me to go south. Rhodes—Last week a doctor told me to go north, south, east or west—he didn't care which. I was calling on his daughter.—New York Globe.

### FURIOUS FIGHTING FOR DARDANELLES.

Paris, May 17.—Advices from Mytilene are that furious fighting continues in the Dardanelles and that the Turkish losses have been extremely heavy. Shells are blowing up whole trenches filled with Turkish soldiers.

### GERMAN ACCOUNT DIFFERS

Berlin Says French and British Have Been Repulsed.

Berlin, May 17.—The following recital of events at the front was given out at the war office:

"Western theater of the war: 'Strong enemy troops have been attacking north of Ypres, our positions east of the canal at Steenstraete and Het Sas, without regard for their own losses. All attacks were repulsed. The battle of Steenstraete continues: 'South of Lille the British made infantry attacks after strong artillery preparations, which already have been repulsed in most places; but fighting continues at one or two points.

"Further south, on both sides of the ridge of Lorette Hills, and at Souchez and at Neuville, north of Arras, renewed French attacks broke down under fire. The French suffered especially heavy losses in the Lorette Hills."

### SEND PETITION TO KAISER

Seek Remission of War Indemnities Levied on Belgians.

Philadelphia, May 17.—Remission for the present at least, of the war indemnities that have been imposed upon cities and provinces in Belgium is petitioned for by prominent educators, churchmen and other well known men from many parts of this country in a memorial addressed to Emperor William of Germany, the text of which was made public here.

The petition was circulated by Herbert Welsh, the widely known publicist and reformer of this city.

### Asking Too Much.

He was a member of a regimental band, and he did not forget to brag about it.

"Why, man, we can play the most intricate airs at sight!" he was saying.

"Indeed!" said the unbelieving listener. "I should like to hear you play the airs the drum major puts on."  
—London Telegraph.

### HELPFUL HINTS FOR HOUSEWIVES

Device For Sprinkling Clothes Evenly and Quickly.

For the purpose of aiding in the operation of sprinkling the clothes prior to the ironing a resident of Canada has invented a cup which distributes the water very thoroughly and does it in a much more satisfactory manner than the old method of dipping the hand into the fluid and flinging it over the clothes. The new cup has a handle, and adjacent to the same, in a position convenient to be controlled by the thumb, there is a trigger which controls the flow of water through perforations in the bottom. Press the trigger and a score of tiny streams are released and flow in an even and gentle manner from the cup. Release the trigger and the flow is immediately stopped.

### Roast Pigeons.

Select plump pigeons, pluck and draw. Rub the inside and outside lightly with salt and pepper. Make a stuffing of equal parts of chopped celery and breadcrumbs seasoned with a little minced onion and a pinch of powdered sage. Moisten this stuffing with milk and melted butter. Stuff the pigeons with teaspoonfuls of this mixture, dropped in lightly. Place a thin slice of fat bacon over the breast of each bird, securing it with a small metal or wooden skewer. Lay them in a buttered pan, breast upward, and roast in a moderate oven. Cook the giblets in a little salted water, chop fine and add to the drippings in the roasting pan. Thicken with flour and add water sufficient to make the gravy.

### Boiled Leg of Mutton.

Remove entirely the thin outer skin, but not the fat from the mutton. Place in kettle and cover with boiling water. Bring quickly to boiling point, boil five minutes and skin. Set on back of range and simmer until tender. When half done add one tablespoonful of salt. If desired brown take out of water when tender, put in a hot oven for a few minutes and serve as roast. If not browned serve with a white sauce. In making the same instead of using milk use one-half milk and one-half mutton stock (the water in which the mutton was boiled). Into the sauce put two finely chopped hard cooked eggs.

### Cabbage Salad.

Beat the yolks of three eggs and one-fourth of a cupful of sugar until light. Add two teaspoonfuls of flour, one teaspoonful of dry mustard, one teaspoonful of salt, one-fourth of a teaspoonful of pepper and one-half of a cupful of vinegar. Cook in a double boiler until thick and stir in one tablespoonful of butter. Cool and mix in lightly one cupful of thick, sour cream, either whipped or plain. Chop one small head of cabbage and one cupful of celery, add one teaspoonful of salt, mix with the dressing and chill.

### Green Tomato Preserves.

Required, eight pounds of smooth green tomatoes, seven pounds of sugar, one ounce of ginger and mace, mixed, and the juice of four lemons. Pierce each of the tomatoes with a fork and put them in the preserving kettle with all the other ingredients. Heat slowly, then boil until the tomatoes are clear; then skim them out and boil the syrup until thick. Put the tomatoes into jars and pour in the hot syrup.

### Creamed Potatoes.

Make a white sauce in the double boiler, using two tablespoonfuls of butter, two tablespoonfuls of flour, one-half teaspoonful of salt, pepper and one cupful of milk. Have cold boiled potatoes, sliced or diced; add to the sauce and serve when well heated through. Sprinkle with grated cheese or chopped parsley just before serving.

### Ink Stains.

To remove ink stains from cloth or other absorbent substance dissolve four ounces of citric acid in two quarts of water that has been previously boiled and cooled. Then add six or eight ounces of a strong, strained solution of borax.

### Bean Cakes.

Mold left over baked beans into cakes, first binding them together with beaten egg. Fry as you would fry potato cakes or fish cakes. Place on a dish and garnish with slices of pickle and sprigs of parsley.

THE "ROSE" FROCK.

Gowns have names this season, and the frock shown here was poetically termed "Rose." It is built of rose colored embroidered chiffon with a full skirt, its fullness confined by garlands of roses. The bodice is cut with a tiny plenum, and the arm straps are chiffon and garlands of roses.

### Walnut Filler Ingredients.

A walnut filler is made of three pounds burnt Turkey umber, one pound of burnt Italian sienna, both ground in oil, then mixed to a paste with one quart of turpentine and one pint of Japan drier.

# POSTPONED!

## Monday, May 24th

Instead of Monday, the 17th

Miss Marie Clark, daughter of Mr. and Mrs. D. M. Clark, of this city, gave a dramatic recital Saturday afternoon, May 15, at the Conservatory of Saint Cecilia, Winona, where she is a student of the department of dramatic expression. She was assisted by Miss Florence McLeod, soprano.

The program given included:

Part I.

"To the Lions"..... Brooks  
Arranged from a "Son of Issachar"  
"Knee Deep in June"..... Riley  
Miss Clark

Songs:

"All on a Summer's Day".....Ncedham  
"Grand Valse"..... Arditi  
Miss McLeod

Part II.

"Japanese Fantasy".....Farrah  
Monologue  
"Cherry Blossoms"..... Sutphen  
Miss Clark

Miss Clark expects to graduate from the conservatory on May 31.

### GRADUATING EXERCISES

Of Teachers Training Class, Daggett Brook Union Sunday School on Sunday, May 16

Graduating exercises of the Teachers Training class of the Daggett Brook Union Sunday school were held Sunday, May 16, at the Daggett Brook Union church.

Rev. Walter J. Smith presided at the ceremonies. The program included a song service, scripture reading and invocation, address by Mrs. Henry Olson, vocal solo by Miss Anna Michaelson, address by Rev. Walter J. Smith, address by Dr. Joseph Nicholson and the presentation of diplomas.

The members of the graduating class were Mrs. Burpee Sewell, Mrs. Ole Anderson, Miss Ivy Anderson, Miss Minnie Fox, Miss Lois Anderson, Claid Shannon and Elmer Peterson.

The class motto was "Christ Our King." The class colors were royal purple and white. The class flower was the purple iris.

A large attendance was present at the graduation exercises and every number of the program was well carried out.

### Young Peoples Meeting

The Young Peoples society of the Norwegian-Danish Lutheran church will meet at Mr. and Mrs. Anton Shello, 1108 Oak Street, Southeast on Tuesday evening, May 18.

### Women's Relief Corps

The ladies of the Womens Relief Corps are giving a benefit entertainment at the Empress theatre tonight, the funds to go toward the G. A. R. fund.

### Lucky Jade.

Since early times the idea has existed in China that a cup made of jade gave health to him who drank it and naturally would counteract a poison. Indeed, the faintest drop of poison was supposed to cause the liquid in which it lay hidden to foam up when brought in contact with jade. Emperors, princes, governors and others who were exposed to the underhand attacks of rivals would, of course, give high prices for cups of jade. In China jade is preeminently the lucky stone, so that a scepter carved out of it is one of the gifts the emperor of China is apt to make to a man whom he wishes to honor.

### Luminous Pictures.

Luminous is a process by which pictures are made of translucent colored papers applied in different thicknesses to glass, the light behind them pouring through them and adding realism to the effect. The principle is not unlike that used by makers of a certain kind of glass window in which the effect is secured by different layers or paintings of glass. The advantage of the paper method lies, of course, entirely in its comparative cheapness. The use of oiled paper as a substitute for colored glass is an old device. It only remained to apply technical skill to the making of designs and working them out in this medium.—New York Times.

### Steps to the Presidency.

"Pa," said little George, "I've chopped down your favorite cherry tree."  
"That's a good start toward the presidency, son," responded wise Mr. Washington. "Now split it into rails."

RECEIVES PRAISE

Words of praise received on the "Brainerd, City of Opportunity and Range Review" special, published May 14, continue to be received.

V. E. Michael, of St. Paul, manager of the Northwest Bureau of the United Press Associations, wrote: "After just completing reading your 'Brainerd, City of Opportunity and Range Review' edition, I desire to heartily congratulate you on it. In my humble opinion, you could not have gotten 24 pages of newspaper together in a better shape. It was bulky throughout, and the generous supply of wholesome advertising sprinkled through it reflected the rightful confidence that the business men of Brainerd have in you."

Col. A. J. Halsted, editor of the Brainerd Tribune: "It was a most commendable edition and deserves much praise."

Senator George H. Gardner: "I was very much pleased with the edition and will send a copy to every member of the senatorial committee which will visit Brainerd in June. It will give them an idea of the kind of a city Brainerd is and let them know something about the range."

C. A. Olson, of Brainerd: "It's a fine paper."

Representative Edward R. Syverson, of Ironton: "It was a splendid edition and what I especially like about the Dispatch is that the special editions come out right on the date promised. When you say May 14, it means that date and not a week later."

Billie Sunday can't come to Minneapolis until 1917, and there are a large number of the clergy of that city who hope he can't come then, and they compose that portion of the ministry who do not believe in the Billie Sunday method.

For the first time in the history of Masonry in Minnesota the two high offices, worthy grand master and worthy grand matron of the Masons and the Order of the Eastern Star, respectively, are filled by a man and his wife. Harry M. Burham, of Jackson, was elected to the first named position, and his wife, Mrs. Mabelle Burham, to the second.

The Little Falls Transcript publishes a list of the guarantors of the 1915 Chautauqua in that city just to remind them that they should get busy and sell the required number of tickets to cover the amount that they have become responsible for. The idea is a good one and should be kept in mind also by the Brainerd guarantors. A little advanced effort will do away with any necessity of digging down in your pocket after the chautauqua closes to make good, as has happened in this city on one or two occasions.

The American Boy asks this question: "Did you ever notice that if you place the transmitter of the telephone against your chest, instead of before your mouth, it makes no apparent difference to your auditor. If you are talking over a desk instrument, it is often easier to hold it against the chest than to the mouth. Simply hold the transmitter to your chest and talk into the open air. The entire chest wall vibrates in unison with the voice and will transmit the sound vibrations over the telephone as well as your voice."

The extermination of mosquitoes by means of bats has proved so successful in the vicinity of San Antonio, Texas, that that city has adopted an ordinance forbidding the killing of these little flying animals, and bat colonies are being established in other mosquito-infested sections of the South. The June Popular Mechanics Magazine says:

"The country around Mitchell Lake, ten miles from San Antonio, where the first of these bat roosts stands, was formerly so thickly infested with mosquitoes that it was almost impossible to remain out of doors at night, and since most of the insects were of the malaria-carrying variety, the section became notorious for the prevalence of 'chills and fever.' Now it is one of the healthiest spots in Texas, and all due to the efforts of the bats."

The department's plan to offset a shortage of \$150,000 in congressional appropriations affects the custodian department of the postoffice throughout the country, and the country is treated to another demonstration of democratic methods in running the business of the government. An order just issued by the treasury department compels more than 4,000 employees in that department to take an enforced lay off of 8 days without pay, between the time of the order and the first of July because there is no money to pay them. This order will affect 4,575 persons; and by far the larger part of them are women, who earn their living by mopping floors and cleaning rooms in the Federal buildings in 896 cities scattered all over the country. These women earn about \$25 a month, and the loss of eight days' pay will be a grievous hardship to them. Some men also are affected by this involuntary vacation, the highest paid of them being the chief of the custodian department at New York, who receives a salary of \$2,800 a year. The order bears the signature of Assistant Secretary Byron Newton, who says, by way of explanation, that Congress is to blame. He asked the Democrats at the Capitol to give him \$2,800,000 for this work and they gave him only \$2,650,000. In the Brainerd office Henry Anderson and Mrs. Christine Sandberg are those affected.

## Talk Of Jess Willard

BY HAL SHERIDAN  
(Written for the United Press)

New York, May 17.—As far as New York is concerned Jess Willard has disappeared from the spotlight. Rarely is his name mentioned by the general public and even the fight fans have many other topics to argue about than the man who humbled the giant black man at Havana.

No where, in fight circles, is heard he heated discussions over his merits and defects as was the situation some years back when champions of other days held the limelight. Willard is even creating less discussion than did Johnson when he won the title from Jeffries. Local ring stars are furnishing more excitement than the champion heavyweight.

How much Jess' stage work has dampened his popularity is impossible to calculate, but not a few fight bugs would rather see the giant cowboy in the ring than behind the footlights. Comparatively few people have seen Jess in action and that is what the followers of the fist sport desire above everything else. Even if they can not see him in action they like to read about him.

There is not much meat in the despatches about Willard for the ring side followers. No one would deny the champ his just share of the little iron men, for his feat in defeating Johnson is worthy of a substantial reward. But between one night stands the big white champ might display his abilities to a fight hungry public.

And perhaps the unpopularity of Willard as a stage favorite will force him into the ring again sooner than he expected. There is little doubt that Willard is not making a howling success of his circus stunt on the footboards. He is not as well adapted to that kind of pastime as some former boxer-actors were. And if press reports can be credited Jess himself cares little for the glare of the footlights. He wants the limelight but the reflection from the little lamps bores him.

A return to the ring would hardly endanger Jess' newly won title. No one is within several years of besting him in a fist argument. At least, not from surface appearance. Some one may develop as rapidly as did Jess himself and humble the western fighting king, but the chance of this occurring is remote. Jess had been plugging at the boxing game for four or five years before he accomplished the "white hope" dream of the ringside sports.

The champion is expected to fight about every second week. The public, thinks of him as a fighting man and to hold the affection of the fight fans he must fulfill their expectations. That attitude accounted for Jeffries' great popularity. Jeffries wanted to fight every man big enough to stand up to him. Stage work should be a by product of a champion real work.

## Sarcastic.

A pompous looking lawyer once chartered a hansom cab, and on reaching his destination he only gave his driver the shilling required by law.

The driver looked at the coin and bit his lip. Then in the most courteous manner he said: "Do step in again, sir. I could ha' dray ye a yard or two farther for this 'ere."—London Fun.

## POPULAR MECHANICS

## Fires In Paint Barrels.

Many serious shop fires have had their origin in a paint barrel or tank used for dip painting. Such tanks or barrels occasionally take fire either spontaneously or through other causes, and when once in flame it is very difficult to extinguish it before damage is done. Water is useless, as it only spreads the burning paint; the ordinary fire extinguisher is in about the same class, and sand, while used by some with fair success, so fills the paint with grit and dirt as to render the entire batch unfit for further use. To put out a fire of this kind the American Machinist points out that a mixture of bicarbonate of soda and fine sawdust in about the proportion of ten pounds of bicarbonate to each bushel of sawdust has been found effective. The mixture is thrown into the burning tank and the cover replaced. The fire is almost instantly choked out by the heavy blanket of carbonic acid gas formed by the burning sawdust and sodium carbonate.

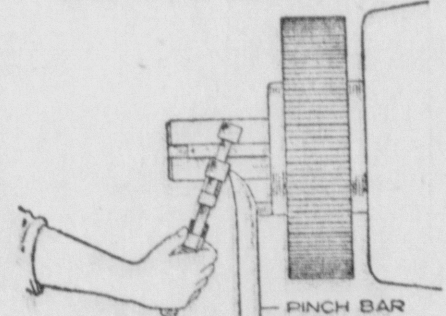

After the fire is out and the tank has cooled the charred sawdust dirt may be skimmed off the top, and the paint underneath will be found free from dirt and in as good condition as before the fire.

## When Iron Is Inflammable.

Iron burns freely under favorable conditions, though such a metal is not commonly thought of as combustible. A piece of soft iron when whittled into a flame burns brilliantly. A recently discovered process, termed by its inventor "colorization," said to protect combustible metals from atmospheric action at high temperatures and make them available for a much wider range of usefulness than is now the case, was recently described in the American Machinist. The metals are heated in revolving drums containing, among other things, finely divided aluminum, by which a surface alloy containing aluminum is produced. Pieces which because of their shape and size are not adapted for tumbling may be colorized by packing them in or painting them with a suitable mixture and heating them. After iron is colorized the effect of heating is slight. Instead of burning and the scale falling off, as in the case of untreated iron, practically no effect can be detected.

## Removing Plain Keys.

Considerable skill is frequently required to remove plain keys fitted in places where it is impossible to get at them with a drift, says Popular Mechanics. One of the simplest successful methods of obtaining the desired result is the use of a monkey wrench and pinch bar, as shown in the illustration.

METHOD OF USING WRENCH AND BAR.

For this purpose a wrench should be used that has sharp edges on its jaws, so these can get a good grip on the key. To further improve the method grooves may be cut on opposite sides of the key, so the jaws will fit better when straddling the key at a slight angle with the face of the keyed machine part. By using a pinch bar against the movable jaw sufficient force can be applied to remove the key unless it is so tightly driven or rusted in place that it will have to be drilled out before it can be released.

## Candles on Cake.

To make candles stay in place on a cake turn a hot knitting needle into the lower end for a couple of inches, pull it out and quickly press into the cavity a wooden toothpick. Let this harden in place and then stick the other end of the toothpick into the top of the cake. If you force the toothpick into the cold candle the candle will crack and break and you cannot manage it, but this way of making the hole for the toothpick with a hot needle is sure to be successful.—Cleveland Leader.

## OUR BRIGHT BLUE SUN.

It Is the Air or Moisture That Makes It Look White or Red.

There is a general belief that sunlight is white and therefore that the sun is white. But this is a long way from the real condition of things. The sun is a bright blue, as blue in color as seems the water of a deep mountain lake. It is the air that makes the sun seem white.

Everybody has noticed when the air is very foggy that the sun appears as a red ball, as red as a red-hot poker. Yet we know the sun hasn't changed at all. It is the mist in the air that makes the color seem different. And in the dawn and dusk, no matter how clear the air may be, the sun is much redder in color than when it is overhead in the middle of the day. The reason for this is that in the morning and evening we see the sun through a thicker belt of air. It is this thicker air which makes it look redder, just as it is the fog which has the same effect. If the air were taken away entirely, then we should expect the sun to be still less red.

Since in the middle of the day the sun is white, how could it be less red? By being blue.

The atmosphere is really like a thick orange colored veil spread between the world and the bright blue sun. Like a veil it dims the light, and its color acts as a filter. Actually the air stops most of the blue rays, but lets nearly all the orange colored rays come through.

It has been quite definitely shown that if it were not for the orange colored veil of the air we could not live upon the earth today. Even as it is the actinic rays of sunlight give sunstroke in summer, and it is in the blue and violet rays that the damage is done. The air softens the sunlight enough for us to bear it.

A few million years hence the sun will be yellow, and already some of its earlier blue heat is gone. But for a million years ahead—"we should worry!"—New York American.

## Repairing Marble.

With a little practice any mechanic can repair holes, cracks or chipped places on marble slabs, so that the patched place cannot be detected from the natural marble, says Popular Mechanics. Use the following mixture as a base filler: Water glass, ten parts; calcined magnesite, two parts, and powdered marble, four parts. These should be mixed thoroughly to a semi-fluid paste. Fill the crack or hole and smooth off level; then, with a camel's hair brush and colors made of aniline in alcohol, work out the veins, body colors, etc., as near to the natural marble as possible. It will depend on the application of the colors whether the repair can be seen or not. Artificial marble slabs can be formed from this mixture.

## Cleaning Before Painting.

The proper cleaning of the surface of iron and steel parts before paint or other protective materials are applied is of the utmost importance. Paint which is put on a surface covered with grease or dirt does not come into good contact with the metal and consequently does not adhere to it. Sooner or later the dirt will fall or be knocked off and the paint will come with it. Beams and other parts which are coated with heavy oil or which have been allowed to lie on the ground until they are covered with mud and dirt should be thoroughly cleaned before painting if it is desired that protection of any permanence is to be secured.—Engineering Magazine.

## From an Author's Journal.

I mortgaged my home to purchase an automobile; then the auto, in a humorous freak, ran down and disabled for life the man who held the mortgage. And to think I had so many enemies I had hoped to put out of business with that same machine!—Atlanta Constitution.

## At Our Boarding House.

"We become what we eat," said the theosophist without any excuse whatsoever.

"No wonder I feel like a menagerie," volunteered the cheerful idiot. "I've been eating hash for a month."—Philadelphia Ledger.

## Bells.

The invention of bells is attributed to the Egyptians, who are credited with having made use of percussion instruments to announce the sacred fetes of Osiris.

MAIL DELIVERY  
MUCH IMPROVED

Rural Carriers Show That They  
 Are a Power In Congress.

TO EXTEND MORE ROUTES.

Republican Leaders Still Look Toward Elihu Root as Possible Presidential Candidate—His Attitude Is Unknown. He Dislikes a Political Campaign on Account of the Hurry and Tumult.

By ARTHUR W. DUNN.

Washington, May 17.—[Special.]—Rural mail delivery caused a great deal of discussion in the last session of congress. It was on account of saving the rural carriers their full pay and to prevent disturbing them that the post-office department was defeated in trying to enact important legislation. The rural carriers showed themselves a power with congress. In fact, it was claimed that the Democratic administration had made a tactical error in trying to secure economy in the rural service.

Postmaster General Burleson has been giving attention to this subject since congress adjourned and has recently announced that he has established rural mail service to every community reasonably entitled to it. Furthermore, postal officials have been instructed to look into the matter and report where additional service is necessary, and the postmaster general says new routes will be established.

It looks as if the postmaster general, finding the rural service a pretty good political machine for congressmen, has taken a hand in the game himself.

## Looking Toward Root.

Many Republican leaders are still looking toward Senator Root as a possible candidate despite his objections on account of age. One of his close friends in Washington says that if there is anything like a strong demand for him Root will accept. The friend recalls that when Root came back as secretary of state in Roosevelt's cabinet he said, "I did not want to return to public life, but I felt that I owed my country whatever she demanded of me." The friend says that Root will take the same position if tendered the nomination for president.

## Dislikes a Campaign.

Mr. Root dislikes campaigning. He is willing to make one or two speeches in a campaign, but he does not like the hurry, the bustle and turmoil of a campaign. That is one reason why he was not a candidate for senator before the people of New York. If the election could have come to him without a scramble he might have taken another term. It is also related that if he could have seen success ahead he might have been induced to make the race. "The trouble with politics," he is said to have remarked to an intimate friend, "is that you must be able to see two years ahead in order to be successful."

## Blow to Big Ships.

One result of the war in Europe will be a blow to big ships. The fact that the nation with the biggest navy in the world has been made almost helpless as against submarines will make it very hard to secure appropriations for big ships in the future. While it is true that submarines have created a horror in the country, it will not deter those who are providing for effective fighting craft from getting the most destructive machines possible.

## Want a Wilson Declaration.

The persistent efforts of the suffragists to get President Wilson to listen to them or to address them has at the bottom a desire to have the president declare himself on the subject. The women who have been so persistent after the president believe that he will speak favorably of suffrage whenever he does talk, and that is why they want a declaration from him. The president, however, is not the kind of a man who can be cajoled or forced into making any statement when he is not ready to make it.

## No Hint From Lodge.

While the talk is going around as to what Colonel Roosevelt may or may not do many people would like to know what Senator Lodge says on the subject, but the Massachusetts senator is absolutely silent. No doubt Lodge will be found supporting Weeks in case his colleague is a candidate. Probably his real first choice would be Elihu Root. If Root should be named it would probably be up to Lodge to try to win over Roosevelt, for in spite of the fact that they parted company in 1912 there is still a warm friendship existing between them, a friendship which has lasted for many years. During that long period Lodge has learned never to assume to speak for Roosevelt. He knows the colonel reserves that right for himself.

## Roberts Feels Vindicated.

During the consideration of the last naval appropriation bill Congressman Roberts of Massachusetts fought for more submarines of a larger and faster type. Now he says he is vindicated by the destructive qualities of those engines of war. He says that these terrors beneath the water are of more value to a nation fighting against another than any other type of vessel, particularly as a means of defense.

## BERNSTORFF DENIES KNOWING LINER WAS TO BE SUNK.

A positive denial that he knew in advance that the Lusitania was to be torpedoed has been made by Count von Bernstorff, the German ambassador.

"I knew nothing of the sinking of the British liner except what I have seen in the newspapers," the count said. "I have nothing official from my government on the subject and naturally I cannot discuss it."

"If I had known in advance, however, I could have gone no further than I did go—to give warning in advertisements of the danger of traveling the war zones in the vessels of a belligerent."

## Anatomy.

A medical student once asked the late Professor Parker Cleveland if there were not more recent works on anatomy than those in the college library.

"Young man," said the professor, "there have been very few new bones added to the human body during the last twenty years."

## DISCONTENT.

Discontent is the want of self reliance; it is infirmity of will. Regret calamities if you can thereby help the sufferer; if not, attend your own work, and already the evil begins to be repaired. Our sympathy is just as base. We come to them who weep foolishly and sit down and cry for company instead of imparting to them truth and health in rough electric shocks, putting them once more in communication with their own reason. The secret of fortune is joy in our hands.—Emerson.

If you force the toothpick into the cold candle the candle will crack and break and you cannot manage it, but this way of making the hole for the toothpick with a hot needle is sure to be successful.—Cleveland Leader.

## OUR BRIGHT BLUE SUN.

It Is the Air or Moisture That Makes It Look White or Red.

There is a general belief that sunlight is white and therefore that the sun is white. But this is a long way from the real condition of things. The sun is a bright blue, as blue in color as seems the water of a deep mountain lake. It is the air that makes the sun seem white.

Everybody has noticed when the air is very foggy that the sun appears as a red ball, as red as a redhot poker. Yet we know the sun hasn't changed at all. It is the mist in the air that makes the color seem different. And in the dawn and dusk, no matter how clear the air may be, the sun is much redder in color than when it is overhead in the middle of the day. The reason for this is that in the morning and evening we see the sun through a thicker belt of air. It is this thicker air which makes it look redder, just as it is the fog which has the same effect. If the air were taken away entirely, then we should expect the sun to be still less red.

Since in the middle of the day the sun is white, how could it be less red? By being blue.

The atmosphere is really like a thick orange colored veil spread between the world and the bright blue sun. Like a veil it dims the light, and its color acts as a filter. Actually the air stops most of the blue rays, but lets nearly all the orange colored rays come through.

It has been quite definitely shown that if it were not for the orange colored veil of the air we could not live upon the earth today. Even as it is the actinic rays of sunlight give sunstroke in summer, and it is in the blue and violet rays that the damage is done. The air softens the sunlight enough for us to bear it.

A few million years hence the sun will be yellow, and already some of its earlier blue heat is gone. But for a million years ahead—"we should worry!"—New York American.

## Repairing Marble.

With a little practice any mechanic can repair holes, cracks or chipped places on marble slabs, so that the patched place cannot be detected from the natural marble, says Popular Mechanics. Use the following mixture as a base filler: Water glass, ten parts; calcined magnesite, two parts, and powdered marble, four parts. These should be mixed thoroughly to a semi-fluid paste. Fill the crack or hole and smooth off level; then, with a camel's hair brush and colors made of aniline in alcohol, work out the veins, body colors, etc., as near to the natural marble as possible. It will depend on the application of the colors whether the repair can be seen or not. Artificial marble slabs can be formed from this mixture.

## Cleaning Before Painting.

The proper cleaning of the surface of iron and steel parts before paint or other protective materials are applied is of the utmost importance. Paint which is put on a surface covered with grease or dirt does not come into good contact with the metal and consequently does not adhere to it. Sooner or later the dirt will fall or be knocked off and the paint will come with it. Before and after parts which are coated with heavy oil or which have been allowed to lie on the ground until they are covered with mud and dirt should be thoroughly cleaned before painting if it is desired that protection of any permanence is to be secured.—Engineering Magazine.

## From an Author's Journal.

I mortgaged my home to purchase an automobile; then the auto, in a humorous freak, ran down and disabled for life the man who held the mortgage. And to think I had so many enemies I had hoped to put out of business with that same machine!—Atlanta Constitution.

## At Our Boarding House.

"We become what we eat," said the theosophist without any excuse whatsoever. "No wonder I feel like a menagerie," volunteered the cheerful idiot. "I've been eating hash for a month."—Philadelphia Ledger.

## Bells.

The invention of bells is attributed to the Egyptians, who are credited with having made use of percussion instruments to announce the sacred fetes of Osiris.

MAIL DELIVERY  
MUCH IMPROVED

Rural Carriers Show That They  
Are a Power In Congress.

TO EXTEND MORE ROUTES.

Republican Leaders Still Look Toward Elihu Root as Possible Presidential Candidate—His Attitude Is Unknown. He Dislikes a Political Campaign on Account of the Hurry and Turmoil.

By ARTHUR W. DUNN.

Washington, May 17.—[Special.]—Rural mail delivery caused a great deal of discussion in the last session of congress. It was on account of saving the rural carriers their full pay and to prevent disturbing them that the post-office department was defeated in trying to enact important legislation. The rural carriers showed themselves a power with congress. In fact, it was claimed that the Democratic administration had made a tactical error in trying to secure economy in the rural service.

Postmaster General Barleson has been giving attention to this subject since congress adjourned and has recently announced that he has established rural mail service to every community reasonably entitled to it. Furthermore, postal officials have been instructed to look into the matter and report where additional service is necessary, and the postmaster general says new routes will be established.

It looks as if the postmaster general, finding the rural service a pretty good political machine for congressmen, has taken a hand in the game himself.

## Looking Toward Root.

Many Republican leaders are still looking toward Senator Root as a possible candidate despite his objections on account of age. One of his close friends in Washington says that if there is anything like a strong demand for him Root will accept. The friend recalls that when Root came back as secretary of state in Roosevelt's cabinet he said, "I did not want to return to public life, but I felt that I owed my country whatever she demanded of me." The friend says that Root will take the same position if tendered the nomination for president.

## Dislikes a Campaign.

Mr. Root dislikes campaigning. He is willing to make one or two speeches in a campaign, but he does not like the hurry, the bustle and turmoil of a campaign. That is one reason why he was not a candidate for senator before the people of New York. If the election could have come to him without a scramble he might have taken another term. It is also related that if he could have seen success ahead he might have been induced to make the race. "The trouble with politics," he is said to have remarked to an intimate friend, "is that you must be able to see two years ahead in order to be successful."

## Blow to Big Ships.

One result of the war in Europe will be a blow to big ships. The fact that the nation with the biggest navy in the world has been almost helpless against submarines will make it very hard to secure appropriations for big ships in the future. While it is true that submarines have created a horror in the country, it will not deter those who are providing for effective fighting craft from getting the most destructive machines possible.

## Want a Wilson Declaration.

The persistent efforts of the suffragists to get President Wilson to listen to them or to address them has at the bottom a desire to have the president declare himself on the subject. The women who have been so persistent after the president believe that he will speak favorably of suffrage whenever he does talk, and that is why they want a declaration from him. The president, however, is not the kind of a man who can be cajoled or forced into making any statement when he is not ready to make it.

## No Hint From Lodge.

While the talk is going around as to what Colonel Roosevelt may or may not do many people would like to know what Senator Lodge says on the subject, but the Massachusetts senator is absolutely silent. No doubt Lodge will be found supporting Weeks in case his colleague is a candidate. Probably his real first choice would be Elihu Root. If Root should be named it would probably be up to Lodge to try to win over Roosevelt, for in spite of the fact that they parted company in 1912 there is still a warm friendship existing between them, a friendship which has lasted for many years. During that long period Lodge has learned never to assume to speak for Roosevelt. He knows the colonel reserves that right for himself.

## Roberts Feels Vindicated.

During the consideration of the last naval appropriation bill Congressman Roberts of Massachusetts fought for more submarines of a larger and faster type. Now he says he is vindicated by the destructive qualities of those engines of war. He says that these terrors beneath the water are of more value to a nation fighting against another than any other type of vessel, particularly as a means of defense.

## BERNSTORFF DENIES KNOWING LINER WAS TO BE SUNK.

A positive denial that he knew in advance that the Lusitania was to be torpedoed has been made by Count von Bernstorff, the German ambassador.

"I knew nothing of the sinking of the British liner except what I have seen in the newspapers," the count said. "I have nothing official from my government on the subject and naturally I cannot discuss it."

"If I had known in advance, however, I could have gone no further than I did go—to give warning in advertisements of the danger of traveling the war zones in the vessels of a belligerent."

## Anatomy.

A medical student once asked the late Professor Parker Cleveland if there were not more recent works on anatomy than those in the college library.

"Young man," said the professor, "there have been very few new bones added to the human body during the last twenty years."

## DISCONTENT.

Discontent is the want of self reliance; it is infirmity of will. Regret calamities if you can thereby help the sufferer; if not, attend your own work, and already the evil begins to be repaired. Our sympathy is just as base. We come to them who weep foolishly and sit down and cry for company instead of imparting to them truth and health in rough electric shocks, putting them once more in communication with their own reason. The secret of fortune is joy in our hands.—Emerson.

## SHERIFF RAIDS IDEAL HOTEL

This Morning under a Warrant Sworn out by Chief of Police, Henry Squires

## TWO DRAY LOADS LIQUOR FOUND

Warrant Charged Larrabee with Keeping an Unlicensed Drinking Place in the City

The Ideal hotel, of which W. T. Larrabee is the proprietor, was raided this morning by Sheriff Claus A. Theorin and Chief of Police Henry Squires under a warrant sworn out by the chief of police charging Larrabee with keeping an unlicensed drinking place.

Under a search warrant two dray loads of beer and whiskey were found and a lot of empty cases and the liquor has been hauled over to the old city jail and stored there.

The raid took place at about 10 o'clock this morning and at the noon hour Sheriff Theorin and Chief Squires had not yet finished their work of hauling away liquor.

## TEAM DID NOT PRACTICE

Brainerd City Team Unable to Play in the Mud and Water on Sunday—The Speedwell Game

The Brainerd city team had no practice game Sunday, the wet field deterring any efforts to play.

The practice game the other Sunday was against the Speedwells and the latter put up a fine game, the score reading 4 to 0 in favor of the city team. Butke pitched first for the Speedwells and 4 runs were rolled up against him in the first two innings. Young Molstad, the high school pitcher, was then put in the box and he checked any more run getting.

The Speedwell lineup included Swanson first base, Bud Roderick, who played a whole season with the Speedwells last year, catcher; Ira Roderick second base, Imgrund shortstop, Ted Stallman third base, Thoe left field, Clark right field and Peterson catcher.

## TODAY'S ODDDEST STORY

Dallas, Tex., May 17.—Dallas recently started to label its eggs to advertise the city. One of the first products of the "Dallas Selects" was a four-legged chicken—(of course, that was from a setting egg, not from the eating variety.) The quadruped is owned by J. B. Addington, and is entirely normal except for its pedal extremities.

## COL. H. C. STIVERS SPOKE

Delivered the "17te Mai" Address at Norwegian Celebration 25 years Ago in City

Twenty-five years ago, said P. M. Zakariassen, who remembers the day very well, Col. H. C. Stivers, editor of the Brainerd Journal, delivered the "17te Mai" address at the big celebration of the Norwegians. It snowed during the day, making weather similar to what Brainerd experienced today.

The parade formed at the Sleeper block on Broadway, the Dreskell band played, and the parade wended its way to the old skating ring on Sixth street north.

It was a grand and glorious occasion and memory of the pleasant anniversary and of the fine address made by Col. Stivers still linger in the memory of P. M. Zakariassen and scores of other people of Scandinavian parentage.

"This '17te Mai' we had the same brand of weather, but no celebration in town. Col. Stivers, by the way, is now the well known and noted editor of the Superior Telegram, Superior, Wis.

## D'Annunzio's "Cabiria"

Manager McMann of the Opera house announces a great feature in moving pictures for Monday and Tuesday, May 17 and 18. "Cabiria" which is said to be "the most magnificent drama ever staged" will be the attraction. Its magnificence of action surpasses human belief. To make this remarkable exposition of silent drama required 7,000 actors, 20 elephants, hundreds of horses, and 14 months' work, at an expense of \$250,000. The New York American refers to it as "an overwhelming combination of startling surprises. The prices here will be 10 and 20 cents only.

## BASEBALL OPENING ON SATURDAY NEXT

Verndale Will Play Here on Saturday and Sunday, all Arrangements Having Been Made

## SEASON OPENS FOR ATHLETICS

Dates Announced for Other Games Showing that in the Line-up are Some Star Players

All arrangements have been made for Verndale to play here next Saturday and Sunday which will officially open the season for the Athletics. At a conference held with Manager Frazier of Verndale, who remained in the city as a guest of his brother-in-law, Sam Parker, who is a member of the team, it was agreed that the games which had been scheduled for May 22d and 23 with other teams should be cancelled and the regular program for the opening days scheduled for last Saturday and Sunday carried out as originally planned.

Several of the Verndale players who reside at distant points arrived in the city Saturday morning despite the efforts of the management to advise them that the games had been called off. Gourd, pitcher, made the run from Randall in his automobile bringing with him two other players. They returned Sunday morning much disappointed.

On May 29th, 30th and 31st the "Woodlands" of Duluth, last year known as the Fitwells, will journey to the city for three games. In their line-up will be seen Sam Menice, an old Northern league player, while the team as a whole is composed of players from different parts of the state. The first game, scheduled for the 29th, will afford the fans a rare treat while of course everyone is pulling for a straight clean up.

Weather permitting, the parade next Saturday is scheduled to start at 3 o'clock forming in front of the City Hall marching east to Eighth street, north on Eighth to Front, west on Front to Sixth, north on Sixth to Kingwood, thence direct to the ball grounds, where a short practice will be held preliminary to the opening festivities. Father J. J. O'Mahoney will make the opening address while Mayor R. A. Beise will pitch the first ball. "Fatty" Woods and "Shorty" Anderson have agreed to stage a few stunts not on the former program while the band will be on the job to play appropriate strains.

The special edition of the Dispatch which was run last Friday evening will be printed again on Friday while added effort is to be made to have as many of the new autos owned by the local fans make up a part of the parade. It is anticipated that an even larger crowd will be on hand to root for the boys than was planned for last Saturday. Never before in the history of local baseball has there been such enthusiasm shown.

Come and hear Peter W. Collins lecture on "The Coming Conflict or the Menace of Socialism," in the Citizens State bank hall Monday evening, May 17, at 8:00 P. M. Everybody welcome. Admission free.

Most Valuable Metal. In estimating the value of any metal we are apt to consider only the intrinsic money value of a given quantity, and from this view gold is generally regarded as the most valuable metal. But this is a mistaken notion. Value consists not merely in pound for pound money worth, but ought to include full consideration of serviceability and usefulness. Taking these into account, a scientific writer points out that iron is the most valuable metal because of the many different ways in which it is of great service to man. In this respect it is of the greatest value, and the world is fortunate in the great amount of it available.

Alaska. After the purchase of Alaska several names were suggested for the new possession, among them Walrusia, American Siberia, Zero Islands and Polario. The name now used was proposed by Charles Sumner, who stated it to be that bestowed by the Indians themselves and given to Captain Cook with the information that it signified "the great land."

Citrolax  
Citrolax  
CITROLAX

## PREACHES HIS FAREWELL SERMON

Rev. A. Zabel's Address Listened to by a Crowded Church on Sunday Evening

## LEAVES FOR SPOKANE, WASH.

Ministerial Association Gives Him Farewell Dinner Today—Rev. Zabel's Successor

Rev. A. Zabel, pastor of the Evangelical church of Northeast Brainerd, preached his farewell sermon last night at the church and will leave tonight for Spokane, Wash., where he assumes his position as superintendent and presiding elder of the Washington state conference. About three-fourths of the state is under Rev. Zabel's jurisdiction and care.

Rev. and Mrs. Zabel have made their home in Brainerd the last four years and during that time the local church has made wonderful progress. The congregation has been increased almost fourfold, the church rebuilt and the Sunday school increased from 35 to 250.

Rev. and Mrs. Zabel and family are most estimable people and Brainerd regrets to see them leave. They wish him much success in his larger field, feeling that his talents for organization and evangelization work will have still larger play.

At the church last evening, where he preached his farewell sermon, were all members of the congregation and many other friends. The church was filled to its most capacity. There was a special program, the sermon of Rev. Zabel moving nearly the entire audience to tears.

Rev. E. F. Brand, of Worthington, is Rev. Zabel's successor and will arrive on Friday to take up the work here. He is a fine singer and speaker, and a young man of good address.

A farewell dinner was given this noon to Rev. A. Zabel by the Ministerial Association. The regular meeting of the association was held in the Y. M. C. A. rooms and from there adjourned to West's restaurant. Six ministers and the secretary of the Y. M. C. A. were present. Mr. Zabel has been a member of the association for the past four years and has always been one of its most earnest supporters.

After a few farewell words by Mr. Zabel, a response was made by Rev. W. J. Lowrie, on behalf of the association.

## TAKING A PERFECT BREATH.

Proper Method of Filling the Entire Lung Cavity With Air.

It does not suffice to breathe pure air. It must be properly breathed. All breathing should be done through the nose—never through the mouth—and, if possible, in the open air, or, at least, before an open window, and several times daily.

The passage of air through the nose has the advantage of being warmed and moistened and, in reality, filtered.

While deep breathing has been advised and written about during recent years, it is interesting to know that oriental teachers and philosophers have known and practiced it for generations. This best of all practices may not promote muscular strength or increase the size of the biceps, but it surely makes directly for the health of the lungs, heart, liver and abdominal organs, and thereby greatly and surely serves the brain.

To take a perfect breath: Stand erect by an open window or out of doors. Pucker up the lips as though starting to whistle and slowly blow out the breath and empty the lungs of air. Then, closing the mouth, breathe through the nose, inhaling slowly and steadily, filling the entire lung cavity, which is done by bringing into play the diaphragm, which, descending, exerts a gentle pressure on the abdomen. In the final movement the lower part of the abdomen will be drawn in, which movement gives the lungs a support and also helps to fill the highest points of the lungs. Retain the breath for a few seconds. Then once again pucker up the lips as if to whistle and through the small opening slowly and gently exhale the breath.—Boston Post.

The Sun in Alaska. Noon on Dec. 21 at Fairbanks, Alaska, is identical with midnight, June 21, at the same place except that it is usually 130 degrees colder and there is snow on the ground. In winter the sun in interior Alaska rises about 10 o'clock and sinks out of sight again about 2 in the afternoon.

The temperature in the latter part of December usually is 40 degrees below zero. Sometimes it goes down to 60 below. In summer the thermometer on June 21 will often show 60 degrees in the shade, thus giving a range of 150 degrees.—Popular Mechanics.

Exchange of Courtesies. One of the keenest journalists and wits, Moritz Gottlieb Saphir, had the better of the late stranger against whom he ran by accident at the corner of a street in Munich. "Beast!" cried the offended person without waiting for an apology. "Thank you," said the journalist, "and mine is Saphir."

## BOYS WORK SURVEY MADE

Older Boys Council Ascertains the Number Young Men Not Going to Sunday School

## THEIR PREFERENCES GIVEN

Statistics Gathered are Compiled into Tables and the Tabulated Returns Published

Ingolf Dillan, president of the Northern Minnesota Older Boys Conference and the Brainerd Older Boys Council, has given this account of the boys' work survey made to increase Sunday school attendance. He said:

"This survey was done through the Older Boys' Council of Brainerd. A house to house canvass was made for every boy in the city, between the ages of fifteen and twenty years. His name was taken, also his age, his address, the name of the Sunday school he is a member of, and, if not a member of any, the one he prefers. As it is now, if one is to invite someone else into his class, he scarcely knows whether that person is already a member of another class (in another Sunday school) or anything about his preference. The purpose of the survey is to connect every older boy in the city with some Sunday school, and they can take steps to get him. They know who to go after and to get.

"A large number of details about a survey of this kind has been omitted because of lack of space. A conference on how to get the older boys back into Sunday school will be held on Tuesday evening. There the survey will be discussed more at length. A strong program is being prepared for that time. More about this, together with the program will be published in the Tuesday Dispatch.

"Several interesting facts were brought to light by this survey. Here are some of them:

"There are about 268 older boys in Brainerd, 227 or 85% of these are protestants, 129 or 56.8% of these are members of Sunday schools, 58% of the boys belong to, or prefer English speaking Sunday schools, 41% foreign speaking. Of the English speaking, 68% are members of Sunday schools; of the foreign speaking, but 50%. The Methodists lead with 29 members; a percentage of 78%. Both the Methodist and Presbyterian have a total of thirty-seven each. More comparisons and contrasts will be given at the meeting Tuesday evening.

"It has been stated on good authority that more than ninety percent of all people have at some time been members of Sunday schools. We find that in Brainerd, nearly half of the older boys are out of Sunday school. Most of those who do attend are not over sixteen years old. Very few are twenty years of age. That means that most of them drop out in the early teens. The work of getting them in again, and holding them will be presented Tuesday evening. Announcements regarding this meeting was made in the churches Sunday. A proposition of this kind deserves the heartiest co-operation of every Sunday school worker of the city. Here is an opportunity to do some real, definite service for the Master; the work is laid out; we need the workers. Are we going to make good?"

Boys' Work Survey, tabulated returns:

Sunday school	Mem.	Pref.	Total

HEAVY RAINFALL  
Nearly Two Inches of Rain Fell on Saturday as Recorded at Station at Gull Lake

One of the heaviest periods of rainfall was that recorded Saturday, May 15, when rain pattered early Saturday morning and up to 6 o'clock in the evening had registered 1.99 inches at the Gull lake weather bureau station. On Sunday 16 hundredths inches of rain fell.

The Speedwell lineup included Swanson first base, Bud Roderick, who played a whole season with the Speedwells last year, catcher; Ira Roderick second base, Ingund shortstop, Ted Stallman third base, Thoe left field, Clark right field and Peterson catcher.

## TODAY'S ODDEST STORY

Dallas, Tex., May 17.—Dallas recently started to label its eggs to advertise the city. One of the first products of the "Dallas Selects" was a four-legged chicken—(of course, that was from a setting egg not from the eating variety.) The quadruped is owned by J. B. Addington, and is entirely normal except for its pedal extremities.

## COL. H. C. STIVERS SPOKE

Delivered the "17th Mai" Address at Norwegian Celebration 25 years Ago in City

Twenty-five years ago, said P. M. Zakariassen, who remembers the day very well, Col. H. C. Stivers, editor of the Brainerd Journal, delivered the "17th Mai" address at the big celebration of the Norwegians. It snowed during the day, making weather similar to what Brainerd experienced today.

The parade formed at the Sleeper block on Broadway, the Dreskell band played, and the parade wended its way to the old skating ring on Sixth street north.

It was a grand and glorious occasion and memory of the pleasant anniversary and of the fine address made by Col. Stivers still linger in the memory of P. M. Zakariassen and scores of other people of Scandinavian parentage.

"This '17th Mai' we had the same brand of weather, but no celebration in town. Col. Stivers, by the way, is now the well known and noted editor of the Superior Telegram, Superior, Wis.

## D'Annunzio's "Cabrira"

Manager McMann of the Opera house announces a great feature in moving pictures for Monday and Tuesday, May 17 and 18. "Cabrira" which is said to be "the most magnificent drama ever staged" will be the attraction. Its magnificence of action surpasses human belief. To make this remarkable exposition of silent drama required 7,000 actors, 20 elephants, hundreds of horses, and 14 months' work, at an expense of \$250,000. The New York American refers to it as "an overwhelming combination of startling surprises. The prices here will be 10 and 20 cents only.

## BASEBALL OPENING ON SATURDAY NEXT

Verndale Will Play Here on Saturday and Sunday, all Arrangements Having Been Made

## SEASON OPENS FOR ATHLETICS

Dates Announced for Other Games Showing that in the Line-up are Some Star Players

All arrangements have been made for Verndale to play here next Saturday and Sunday which will officially open the season for the Athletics. At a conference held with Manager Frazier of Verndale, who remained in the city as a guest of his brother-in-law, Sam Parker, who is a member of the team, it was agreed that the games which had been scheduled for May 22d and 23 with other teams should be cancelled and the regular program for the opening days scheduled for last Saturday and Sunday carried out as originally planned.

Several of the Verndale players who reside at distant points arrived in the city Saturday morning despite the efforts of the management to advise them that the games had been called off. Gourd, pitcher, made the run from Randall in his automobile bringing with him two other players. They returned Sunday morning much disappointed.

On May 29th, 30th and 31st the "Woodlands" of Duluth, last year known as the Fitwells, will journey to the city for three games. In their line-up will be seen Sam Menice, an old Northern league player, while the team as a whole is composed of players from different parts of the gregations. The first game is scheduled for the 29th and will afford the fans a rare treat while of course everyone is pulling for a straight clean up.

Weather permitting, the parade next Saturday is scheduled to start at 3 o'clock forming in front of the City Hall marching east to Eighth street, north on Eighth to Front, west on Front to Sixth, north on Sixth to Kingwood, thence direct to the ball grounds, where a short practice will be held preliminary to the opening festivities. Father J. J. O'Mahoney will make the opening address while Mayor R. A. Beise will pitch the first ball. "Fatty" Woods and "Shorty" Anderson have agreed to stage a few stunts not on the former program while the band will be on the job to play appropriate strains.

The special edition of the Dispatch which was run last Friday evening will be printed again on Friday while added effort is to be made to have as many of the new autos owned by the local fans make up a part of the parade. It is anticipated that an even larger crowd will be on hand to root for the boys than was planned for last Saturday. Never before in the history of local baseball has there been such enthusiasm shown.

Come and hear Peter W. Collins lecture on "The Coming Conflict or the Menace of Socialism," in the Citizens State bank hall Monday evening, May 17, at 8:00 P. M. Everybody welcome. Admission free.

**Most Valuable Metal.**  
In estimating the value of any metal we are apt to consider only the intrinsic money value of a given quantity, and from this view gold is generally regarded as the most valuable metal. But this is a mistaken notion. Value consists not merely in pound for pound money worth, but ought to include full consideration of serviceability and usefulness. Taking these into account, a scientific writer points out that iron is the most valuable metal because of the many different ways in which it is of great service to man. In this respect it is of the greatest value, and the world is fortunate in the great amount of it available.

**Alaska.**  
After the purchase of Alaska several names were suggested for the new possession, among them Waiatussia, American Siberia, Zero Islands and Polario. The name now used was proposed by Charles Sumner, who stated it to be that bestowed by the Indians themselves and given to Captain Cook with the information that it signified "the great land."

Citrolax  
Citrolax  
CITROLAX

Best thing for constipation, sour stomach, lazy liver and sluggish bowels. Stops a sick headache almost at once. Gives a most thorough and satisfactory flushing—no pain, no nausea. Keeps your system cleansed, sweet and wholesome. Ask for Citrolax. For sale by H. P. Dunn, druggist.—Adv.

## PREACHES HIS FAREWELL SERMON

Rev. A. Zabel's Address Listened to by a Crowded Church on Sunday Evening

## LEAVES FOR SPOKANE, WASH.

Ministerial Association Gives Him Farewell Dinner Today—Rev. Zabel's Successor

Rev. A. Zabel, pastor of the Evangelical church of Northeast Brainerd, preached his farewell sermon last night at the church and will leave tonight for Spokane, Wash., where he assumes his position as superintendent and presiding elder of the Washington state conference. About three-fourths of the state is under Rev. Zabel's jurisdiction and care.

Rev. and Mrs. Zabel have made their home in Brainerd the last four years and during that time the local church has made wonderful progress. The congregation has been increased almost fourfold, the church rebuilt and the Sunday school increased from 35 to 250.

Rev. and Mrs. Zabel and family are most estimable people and Brainerd regrets to see them leave. They wish him much success in his larger field, feeling that his talents for organization and evangelization work will have still larger play.

At the church last evening, where he preached his farewell sermon, were all members of the congregation and many other friends. The church was filled to its most capacity. There was a special program, the sermon of Rev. Zabel moving nearly the entire audience to tears.

Rev. E. F. Brand, of Worthington, is Rev. Zabel's successor and will arrive on Friday to take up the work here. He is a fine singer and speaker, and a young man of good address.

A farewell dinner was given this noon to Rev. A. Zabel by the Ministerial Association. The regular meeting of the association was held in the Y. M. C. A. rooms and from there adjourned to West's restaurant. Six ministers and the secretary of the Y. M. C. A. were present. Mr. Zabel has been a member of the association for the past four years and has always been one of its most earnest supporters.

After a few farewell words by Mr. Zabel, a response was made by Rev. W. J. Lowrie, on behalf of the association.

## TAKING A PERFECT BREATH.

Proper Method of Filling the Entire Lung Cavity With Air.

It does not suffice to breathe pure air. It must be properly breathed. All breathing should be done through the nose—never through the mouth—and, if possible, in the open air, or, at least, before an open window, and several times daily.

The passage of air through the nose has the advantage of being warmed and moistened and, in reality, filtered.

While deep breathing has been advised and written about during recent years, it is interesting to know that oriental teachers and philosophers have known and practiced it for generations. This best of all practices may not promote muscular strength or increase the size of the biceps, but it surely makes directly for the health of the lungs, heart, liver and abdominal organs, and thereby greatly and surely serves the brain.

To take a perfect breath: Stand erect by an open window or out of doors. Pucker up the lips as though starting to whistle and slowly blow out the breath and empty the lungs of air. Then, closing the mouth, breathe through the nose, inhaling slowly and steadily, filling the entire lung cavity, which is done by bringing into play the diaphragm, which, descending, exerts a gentle pressure on the abdomen. In the final movement the lower part of the abdomen will be drawn in, which movement gives the lungs a support and also helps to fill the highest points of the lungs. Retain the breath for a few seconds. Then once again pucker up the lips as if to whistle and through the small opening slowly and gently exhale the breath.—Boston Post.

**The Sun in Alaska.**  
Noon on Dec. 21 at Fairbanks, Alaska, is identical with midnight, June 21, at the same place except that it is usually 120 degrees colder and there is snow on the ground. In winter the sun in interior Alaska rises about 10 o'clock and sinks out of sight again about 2 in the afternoon.

The temperature in the latter part of December usually is 40 degrees below zero. Sometimes it goes down to 60 below. In summer the thermometer on June 21 will often show 90 degrees in the shade, thus giving a range of 150 degrees.—Popular Mechanics.

**Exchange of Courtesies.**  
One of the keenest journalists and wits, Moritz Gottlieb Saphir, had the better of the late stranger against whom he ran by accident at the corner of a street in Munich. "Beast!" cried the offended person without waiting for an apology. "Thank you," said the journalist, "and mine is Saphir."

## BOYS WORK SURVEY MADE

Older Boys Council Ascertains the Number Young Men Not Going to Sunday School

## THEIR PREFERENCES GIVEN

Statistics Gathered are Compiled Into Tables and the Tabulated Returns Published

Ingolf Dillan, president of the Northern Minnesota Older Boys Conference and the Brainerd Older Boys Council, has given this account of the boys' work survey made to increase Sunday school attendance. He said:

"This survey was done through the Older Boys' Council of Brainerd. A house to house canvass was made for every boy in the city, between the ages of fifteen and twenty years. His name was taken, also his age, his address, the name of the Sunday school he is a member of, and, if not a member of any, the one he prefers. As it is now, if one is to invite someone else into his class, he scarcely knows whether that person is already a member of another class (in another Sunday school) or anything about his preference. The purpose of the survey is to connect every older boy in the city with some Sunday school, and they can take steps to get him. They know who to go after and to get.

"A large number of details about a survey of this kind has been omitted because of lack of space. A conference on how to get the older boys back into Sunday school will be held on Tuesday evening. There the survey will be discussed more at length. A strong program is being prepared for that time. More about this, together with the program will be published in the Tuesday Dispatch.

"Several interesting facts were brought to light by this survey. Here are some of them:

"There are about 268 older boys in Brainerd, 227 or 85% of these are protestants, 129 or 56.8% of these are members of Sunday schools, 58% of the boys belong to, or prefer English speaking Sunday schools, 41% foreign speaking. Of the English speaking, 68% are members of Sunday schools; of the foreign speaking, but 59%. The Methodists lead with 29 members, a percentage of 78%. Both the Methodist and Presbyterian have a total of thirty-seven each. More comparisons and contrasts will be given at the meeting Tuesday evening.

"It has been stated on good authority that more than ninety percent of all people have at some time been members of Sunday schools. We find that in Brainerd, nearly half of the older boys are out of Sunday school. Most of those who do attend are not over sixteen years old. Very, very few are twenty years of age. That means that most of them drop out in the early teens. The work of getting them in again, and holding them will be presented Tuesday evening. Announcements regarding this meeting was made in the churches Sunday. A proposition of this kind deserves the heartiest co-operation of every Sunday school worker of the city. Here is an opportunity to do some real, definite service for the Master; the work is laid out; we need the workers. Are we going to make good?"

Boys' Work Survey, tabulated returns:

**HEAVY RAINFALL**  
Nearly Two Inches of Rain Fell on Saturday as Recorded at Station at Gull Lake

One of the heaviest periods of rainfall was that recorded Saturday, May 15, when rain pattered early Saturday morning and up to 6 o'clock in the evening had registered 1.99 inches at the Gull lake weather bureau station. On Sunday 16 hundredths inches of rain fell.

## EVERY MOTHER SHOULD VISIT OUR STORE DURING CHILDREN'S WEEK

We have something of particular interest for the mother of girls up to fourteen years of age and for boys up to six years of age. Particularly note the display in our windows; this will give you some idea of what we have for the children.

See our children dresses at 25c, 50c, 75c and \$1.00. See our rompers and crepes at 25c, 50c and 60c. See our boys wash suits at 50c, 75c and \$1.00. See our infants dresses and accessories. See our children's white summer hats. These are a few of the things to see.

Bring the Children: We have a toy for every home. Mothers bring in a child and let them secure one. Also let the little lady give the name of the doll. She may secure it.

## IOWA SHRINER PASSED AWAY

Henry W. Van Sickle, of LeMars, Iowa, Died at Home of Granddaughter, Mrs. Chas. Sutter

WAS ACTIVE IN BUSINESS LIFE  
Was 83 Years Old, Visited Brainerd Annually on His Vacation Trips For Last 20 Years

A prominent Shriner of Iowa, active in business life until his death, Henry W. Van Sickle, aged 83, passed away Sunday morning at 3 o'clock at the home of his granddaughter, Mrs. Charles Sutter, residing a half mile north of Gull River, where he had been visiting a few days. Heart disease was the immediate cause of death.

Mr. Van Sickle conducted a novelty advertising business at LeMars, Iowa, and on his way from Iowa to Minnesota had booked many orders. For the last twenty years he had visited his relatives in Minnesota annually.

He was prominent in Masonic circles, holding membership in the Shriners of Sioux City, Iowa. The body will be sent to Iowa today for burial.

His wife passed away seven years ago. There are seven children living, being Harry Van Sickle, Brainerd; Mrs. F. J. Kennedy, Laverne, Minn.; Watson Van Sickle, Sioux City, Iowa; Mrs. C. M. Hough, near Gull Lake, Brainerd, Minn.; Mrs. O. L. Laudenslager, Mrs. Rhoda V. Tempel and J. H. Van Sickle of LeMars, Iowa.

"Slowed up" at Middle Age

The hard working kidneys seem to require aid sooner than other internal organs. At middle age many men and women feel twinges of rheumatism, have swollen or aching joints and are distressed with sleep disturbing bladder ailments. Foley Kidney Pills are safe, prompt and can be depended on to give relief. For sale by J. P. Dunn, druggist.—Adv.

## REBEL FORCES ARE SUCCESSFUL

New Portuguese Government Is Set Up at Lisbon.

ORDER IS BEING RESTORED

Whereabouts of President De Arriaga Is Unknown.

Lisbon, May 17.—The success of the revolutionary forces has been confirmed. The new government, which will be presided over by Joao Chagas, was proclaimed from the windows of the city hall with enthusiastic manifestations.

The military governor of Lisbon posted proclamations calling upon civilians to deliver up all arms at the arsenal under pain of arrest.

One hundred prisoners were taken to warships.

Order has been partly restored and the new government is taking measures to re-establish normal conditions. The former minister of marine was arrested and taken aboard a warship for having ordered a destroyer to sink the warships which were bombarding the city.

All the regiments in Lisbon and in the provinces have surrendered.

## ANARCHY EXISTS IN LISBON

Large Number of Persons Killed and Wounded.

Madrid, May 17.—Complete anarchy reigns in Lisbon, according to news reaching Madrid. Fighting in the streets continues between the mutineers and the loyal troops.

The bombardment was stopped owing to a lack of ammunition.

The number of persons killed or wounded is said to have been considerable. Many buildings were burned and the homes of known loyalists pillaged.

The whereabouts of President de Arriaga is still unknown.

It is declared that, although multitudes occurred among the crews of several of the warships, the army is loyal.

## PREMIER SALANDRA STAYS

Italian King Refuses to Accept His Resignation.

Rome, May 17.—Chances between Italian and Austrian troops are reported to be occurring on the frontier. The Austrians, according to one report, have attempted to cross the boundary at one point, but were repulsed by the Italians, who took several prisoners.

The king's refusal to accept the resignation of Signor Salandra and his whole war cabinet, it is confidently believed here, foreshadows the almost immediate entrance of Italy into the circle of belligerents on the side of the allies.

Action, however, may be delayed until the meeting of the chamber of deputies on Thursday, when the premier will announce his policy and will receive the support of a majority of the deputies.

## MORE AIR RAIDS IN ENGLAND

Bombs Dropped on Ramsgate and Margate Visited.

Ramsgate, Eng., May 17.—An air raid occurred here. About forty incendiary bombs were dropped. Three persons were injured.

The aircraft, a Zeppelin, also flew over Margate. No news of the damage there has been received.

The Bull hotel here was almost wrecked. The bomb pierced its way to the cellar. Three hotel guests were injured.

Several fishing smacks were damaged.

## STRIKE HALTS LONDON CARS

Men's Demand for 15 Per Cent War Bonus Is Refused.

London, May 17.—The London county municipal railway street car system is tied up by a strike of its men, who are demanding a 15 per cent war bonus, owing to the increased cost of living. The demand has been refused by the county council.

Only forty cars out of 1,500 are running. These are chiefly on the Woolwich arsenal line. Great inconvenience in the southern section of the city is being caused by the strike.

## FATHER KILLED, SON DYING

Pennsylvania State Constabulary Is Seeking Six Armed Men.

Washington, Pa., May 17.—M. Cohen, fifty-five, a well-to-do merchant of East Marietta, near here, was shot and killed, and his son, Moses Cohen, twenty-three, was wounded seriously, by six armed men in the Cohen home.

Sheriff R. G. Lutton and a detachment of state constabulary are seeking the men.

No motive for the shooting is known.

## SUPPRESS YAQUI INDIANS

Mexican Soldiers Put an End to the Uprising.

Washington, May 17.—Raiding Yaqui Indians, who killed several Americans in a recent outbreak in the Yaqui valley, in Mexico, have been checked. Admiral Howard reported to the navy department, and it now probably will not be necessary to land marines and bluejackets from the cruisers Raleigh and New Orleans at Ensenada.

Mexican state troops, which at first had declined to give battle to the Indians, finally went into the fighting. Admiral Howard reported, and checked the raid. The dispatch does not mention further loss of American lives and says the situation is encouraging.

## SLAYS WIFE AND HIMSELF

Jersey Man Also Probably Fatally Wounded: Father-in-Law.

Jacobstown, N. J., May 17.—Edward Applegate, twenty-four years old, of Wheatshaf, Pa., killed his wife, twenty-two, probably fatally wounded his father-in-law, Edward De Bon, wounded his mother-in-law and then ended his own life on the De Bon farm.

The young couple had been married for three years. A few days ago they quarreled and Mrs. Applegate returned to her parents' home. Applegate visited her there and when she refused to return home killed her with one shot from a revolver.

## Turkish Ships Destroyed.

London, May 17.—The Russian naval attaché here announces that on May 15 the Russian Black sea fleet destroyed four steamers, coal laden, two tugs and twenty sailing ships.

## Germany Must Answer for These

CAPTAIN ALFRED GUNTER WIRELESS OPERATOR C. C. SHORT

President Wilson's note to Germany demands satisfaction for the lives of wireless operator C. C. Short and Captain Alfred Gunter and for the attack on the Gulfight off the Scilly Islands, as well as for the American lives lost on the Lusitania. In fact, the Gulfight will go down in American history as one of the most famous of ships.

## IN THE WORLD OF SPORT

Pat Moran, Manager of Philadelphia Nationals.

Photo by American Press Association.

Patrick J. Moran, manager of the Philadelphia National league club, is the early season sensation of the baseball world. When Pat succeeded Charley Doolin as manager he began laying plans for a rejuvenated team. He secured a lot of youngsters and got rid of some of the old timers. "I don't care for waning stars," said Moran. "I want ambitious ball players." He was willing to part with Magee, Robert, Doolin and others. Whittier for Magee suited Moran, and many think it was a good play. It is hardly to be expected that he can win the pennant this year, but he has started out showing that he is a clever baseball man and will keep the Quaker team in the running. Moran joined the big league as a member of the Bostonians in 1901 as a catcher. He went to the Chicago Cubs in 1906 and since 1910 has been with Philadelphia.

Motorboat Wonder For Drexel.

George W. Childs Drexel, the Philadelphia sportsman and commodore of the Corinthian Yacht club, is having built for himself the speed wonder of the 1915 crop of motorboats, a runabout which will be guaranteed to average thirty-two miles an hour. The boat will be called the Ace and will have a beam of seven feet eight and one-half inches. Her lines and general appearance as to construction of the hull, coupled with the immense power to be installed, give every indication that the new craft will be able to attain a speed of about thirty-five miles per hour. For propulsion two eight-cylinder high speed motors will be installed in the boat, each of which is rated at about 200 horsepower. The boat is about one-third completed and will be ready for launching early in the coming motor boating season.

Trout In Quarry Pits.

Abandoned granite quarry pits in Gloucester have yielded many more brook trout to the fishermen in that community in the open season than the brooks in the woodland, according to information received at the offices of the Massachusetts state fish and game commissioners. Edward Babson, secretary of the Cape Ann Fish and Game Protective association, was the first one to think of having the quarry pits stocked with trout, and two years ago six cases of fingerling trout were placed

in the pits. The results of this experiment were so successful that the association has since stocked the pits with trout.

## WOMEN CALM AS THEY FACE DEATH

One Saw Torpedo Speeding to Send Lusitania to Doom.

SURVIVOR'S STIRRING STORY

Passengers Had Been Thinking of Nothing but Possible Fate After German Threat, and as Ship Was Struck American Exclaimed, "By Heavens, They've Done It!"

Oliver P. Barnard, the scenic artist of the Covent Garden Opera, who told of A. G. Vanderbilt's bravery and Frohman's stoicism, gave the following account of the torpedoing of the Lusitania:

"It was my rare fortune to be one of four people who saw the torpedo of the German submarine fired at the Lusitania at a distance of probably not more than 200 yards. I had just come up from luncheon and was looking across an uncommonly calm and beautiful sea when I saw on the starboard what at first seemed to be the tail of a fish. It was the periscope of our assailant.

"The next thing I observed was the fast lengthening track of a newly launched torpedo, itself a streak of froth. We had all been thinking, dreaming, sleeping and eating 'submarines' from the hour we left New York, and yet with the dreadful danger about to descend upon us I could hardly believe the evidence of my own eyes.

"An American lady rushed up to where I stood, exclaiming nonchalantly, 'This isn't a torpedo, is it?'

"I was too spellbound to answer. I felt absolutely sick.

Hit With Terrific Impact.

"Then we were hit. My impression of the contact of the torpedo was that it was an indescribably terrific impact, though not marked by anything such as the imagination might fancy in the way of a roar.

"The torpedo must have penetrated deeply into the side of the vessel and exploded internally.

"The point of contact was about beneath the grand entrance to the saloon, and the result of the explosion was that it blew everything in that immediate vicinity into smithereens. Then the tremendous water tanks on the funnel deck burst, releasing their enormous contents and flooding everything.

"The moment the explosion took place the Lusitania simply fell over just as a house, kept up by underpinning, would topple the instant the main props were pulled out.

Stunned and Astounded.

"Instantly there was a tremendous rush of passengers to the deck from the saloon and lounge. I did not think that anybody, not even the women and children, were so much terrified as they were astounded and stunned by the consciousness that the fears, cherished half in ridicule for five days previously, had at last been realized and the German bluff had actually come off.

"By heavens, they've done it!" ejaculated a broad shouldered American whom I never saw again.

"That was the first universal thought. 'What shall we do?' was the next.

"Many people, evidently convinced that the Lusitania was unsinkable, made preparations to sit tight and let things take their course.

"My own first impulse was to obtain a life belt. Excitement and fright were now everywhere, but there was no panic. 'Keep cool' seemed to be everybody's motto, though there was on all hands a pell-mell scurry below to obtain life belts. Every second people reappeared singly, in pairs and in groups armed with belts, uselessly carried out in most cases and inadequately strapped on. Others forgot the belts and devoted themselves to hunting for their relatives.

Brave Wireless Lad.

"The last passenger I spoke to was a young American bride, Mrs. Stewart Mason, the daughter of William Lindsay, an American manufacturer.

"Have you seen my husband?" she shrieked at me appealingly.

"I crossed over to the starboard side again, and on my way encountered the two Marconi operators in the emergency wireless room. They, too, were coolness personified. I learned from them that the explosion had put the main wireless room out of action. It also put out every electric light in the ship.

"Finding that he could do no more a young operator, superbly humored and careless of what looked like sure

disaster for us all, took up a kneeling position on the funnel deck in order to make snapshots of the Lusitania setting to its doom.

"The 'snap' was probably the only one attempted in the whole ship, but it did not come off. A further lurch of the boat upset him and his plans, for the last glimpse I had of him was astride a chair in which he said that he was going to sit down and swim.

"The glorious old cry of the sea, 'Women and children first,' was the unvarying rule on the Lusitania. Some man, whom I assumed to be an alien steerage passenger, was the only person to attempt to violate it.

"Certainly not more than fifteen minutes, or eighteen at the outside, elapsed after the torpedo impact before the Lusitania was gone."

Meteors as They Fall.

When a meteorite enters the earth's atmosphere it is moving with a velocity of more than twenty miles per second. The friction of its swift rush through the air produces a tremendous temperature, and the outer parts of the meteor are melted off and dissipated in fiery vapor, but the passage through the atmosphere is so quickly completed that the inner portions are not affected, and meteorites have been picked up after their fall and found to be freezing cold within. Their velocity is so rapidly reduced by the resistance of the air that when they strike the earth they usually penetrate only a few feet at the most into the soil.

## SAW VICTIMS FLOATING.

Passenger on Canadian Liner Sends Remarkable Wireless Message.

A passenger of the Canadian Pacific steamship Mississauga, from Halifax, which passed over the scene of the Lusitania disaster twenty-four hours later, immediately sent the following remarkable message to the London Times. He was then in ignorance of the truth:

"Saturday, 1:30 o'clock, I see floating deck chairs and a boat upon the bow of which I read the word 'Liverpool.' Our ship swings her around and on the other side the word 'Lusitania.' My God, it has happened!

"I realize that we are on the scene of a great tragedy. There are other lifeboats about. One contains a pair of boots and a hat. There are collapsible boats awash, some with sides not up. There is a whaleboat keel upward with a body lying over it, the lifebelt slipping off the neck. Yes, a dead man.

"Captain Evans, our commander, has 1,000 lives aboard his ship to get to safety, and up goes our speed, and we are dashing away on a zigzag course. Just now a bald head bobs up in the water not twenty-five feet away from us. It is ghastly in the sunshine.

"The water is almost motionless. The silence and impressiveness of it all are coupled with the dawning sense of our own danger. It has brought wonderful calm to all. Our women are fine—silent and sad, with full sympathy which overrides fear.

"We can do naught but race on, but by 6 o'clock tonight our risk will be over. Captain Evans' calm and dignity are fine, yet no man could live his previous twenty-four hours unmoved, and his own thoughts must have flown to his own son in the trenches."

## WENT DOWN WITH FUNNEL.

Philadelphia Man Tells of Miraculous Escape on Lusitania.

Samuel M. Knox of Philadelphia, who was on the Lusitania, gives this account of his escape:

"When it was certain the liner was sinking I went overboard at once and attempted to get clear of the ship which was coming over slowly. I was caught by one of the smokestacks and carried down a considerable distance before being released.

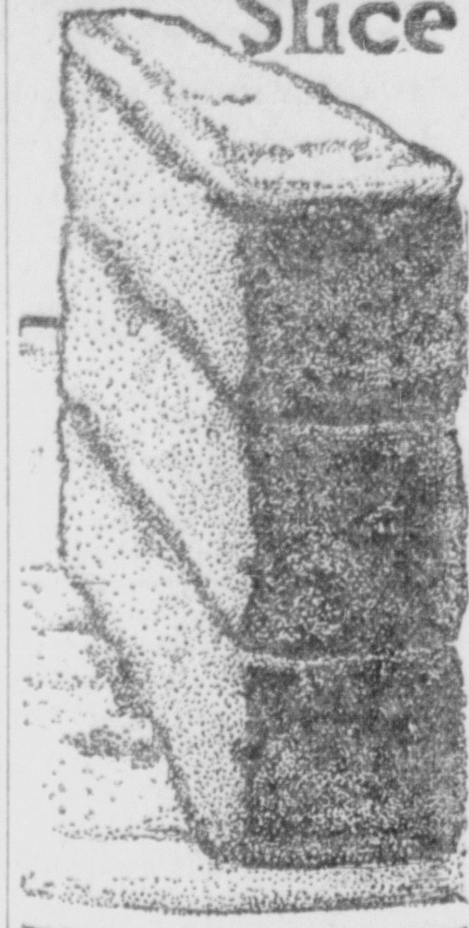

"On coming to the surface I floated about for a considerable time, when I was picked up by a life raft.

"This raft, with others, had floated free when the vessel sank and had been picked up and taken in charge by Mr. Gannett of Washington and Mr. Lauriat of Boston, who picked up thirty-two persons in all. It was equipped with oars, and we made our way to a fishing smack about five miles distant, which took us on board, although it was already overloaded."

## A Seventy-Year-Old Couple

Mr. and Mrs. T. B. Carpenter, Harrisburg, Pa., suffered from kidney trouble for many years but have been entirely cured by Foley Kidney Pills. He says: "Although we are both in the seventies we are as vigorous as we were thirty years ago." Foley Kidney Pills stop sleep disturbing bladder weakness, backache, rheumatism and aching joints. ## REBEL FORCES ARE SUCCESSFUL

New Portuguese Government Is Set Up at Lisbon.

## ORDER IS BEING RESTORED

Whereabouts of President De Arriaga Is Unknown.

Lisbon, May 17.—The success of the revolutionary forces has been confirmed. The new government, which will be presided over by João Chagas, was proclaimed from the windows of the city hall with enthusiastic manifestations.

The military governor of Lisbon posted proclamations calling upon civilians to deliver up all arms at the arsenal under pain of arrest.

One hundred prisoners were taken to warships.

Order has been partly restored and the new government is taking measures to re-establish normal conditions. The former minister of marine was arrested and taken aboard a warship for having ordered a destroyer to sink the warships which were bombarding the city.

All the regiments in Lisbon and in the provinces have surrendered.

## ANARCHY EXISTS IN LISBON

Large Number of Persons Killed and Wounded.

Madrid, May 17.—Complete anarchy reigns in Lisbon, according to news reaching Madrid. Fighting in the streets continues between the mutineers and the loyal troops.

The bombardment was stopped owing to a lack of ammunition.

The number of persons killed or wounded is said to have been considerable. Many buildings were burned and the homes of known loyalists pillaged.

The whereabouts of President de Arriaga is still unknown.

It is declared that, although mutinies occurred among the crews of several of the warships, the army is loyal.

## PREMIER SALANDRA STAYS

Italian King Refuses to Accept His Resignation.

Rome, May 17.—Clashes between Italian and Austrian troops are reported to be occurring on the frontier. The Austrians, according to one report, have attempted to cross the boundary at one point, but were repulsed by the Italians, who took several prisoners.

The king's refusal to accept the resignation of Signor Salandra and his whole war cabinet, it is confidently believed here, foreshadows the almost immediate entrance of Italy into the circle of belligerents on the side of the allies.

Action, however, may be delayed until the meeting of the chamber of deputies on Thursday, when the premier will announce his policy and will receive the support of a majority of the deputies.

## MORE AIR RAIDS IN ENGLAND

Bombs Dropped on Ramsgate and Margate Visited.

Ramsgate, Eng., May 17.—An air raid occurred here. About forty incendiary bombs were dropped. Three persons were injured.

The aircraft, a Zeppelin, also flew over Margate. No news of the damage there has been received.

The Hull hotel here was almost wrecked. The bomb pierced its way to the cellar. Three hotel guests were injured.

Several fishing smacks were damaged.

## STRIKE HALTS LONDON CARS

Men's Demand for 15 Per Cent War Bonus Is Refused.

London, May 17.—The London county municipal railway street car system is tied up by a strike of its men, who are demanding a 15 per cent war bonus, owing to the increased cost of living. The demand has been refused by the county council.

Only forty cars out of 1,500 are running. These are chiefly on the Woolwich arsenal line. Great inconvenience in the southern section of the city is being caused by the strike.

## FATHER KILLED, SON DYING

Pennsylvania State Constabulary Is Seeking Six Armed Men.

Washington, Pa., May 17.—M. Cohen, fifty-five, a well to do merchant of East Marietta, near here, was shot and killed, and his son, Moses Cohen, twenty-three, was wounded seriously, by six armed men in the Cohen home.

Sheriff R. G. Lutton and a detachment of state constabulary are seeking the men.

No motive for the shooting is known.

## SUPPRESS YAQUI INDIANS

Mexican Soldiers Put an End to the Uprising.

Washington, May 17.—Raiding Yaqui Indians, who killed several Americans in a recent outbreak in the Yaqui valley, in Mexico, have been checked. Admiral Howard reported to the navy department, and it now probably will not be necessary to land marines and bluejackets from the cruisers Raleigh and New Orleans at Bayamas.

Mexican state troops, which at first had declined to give battle to the Indians, finally went into the fighting. Admiral Howard reported, and checked the raid. The dispatch does not mention further loss of American lives and says the situation is encouraging.

## SLAYS WIFE AND HIMSELF

Jersey Man Also Probably Fatally Wounds Father-in-Law.

Jacobstown, N. J., May 17.—Edward Applegate, twenty-four years old, of Wheatshar, Pa., killed his wife, twenty-two, probably fatally wounded his father-in-law, Edward De Bou, wounded his mother-in-law and then ended his own life on the De Bou farm.

The young couple had been married for three years. A few days ago they quarreled and Mrs. Applegate returned to her parents' home. Applegate visited her there and when she refused to return home killed her with one shot from a revolver.

## Turkish Ships Destroyed.

London, May 17.—The Russian naval attaché here announces that on May 15 the Russian Black sea fleet destroyed four steamers, coal laden, two tugs and twenty sailing ships.

\*\*\*\*\*

**TWO KILLED WHEN TRAIN STRIKES AUTO.**

\*\*\*\*\*

Windsor, Ill., May 17.—Mrs. Hannah Turner and Mrs. Nan Turner were killed and Mrs. Barker and James C. Renner probably were fatally hurt when their automobile was struck by a Big Four limited train.

## Germany Must Answer for These

CAPTAIN ALFRED GUNTER WIRELESS OPERATOR C. C. SHORT

President Wilson's note to Germany demands satisfaction for the lives of wireless operator C. C. Short and Captain Gunter and for the attack on the Gulfstream off the Selly Islands, as well as for the American lives lost on the Lusitania. In fact, the Gulfstream will go down in American history as one of the most famous of ships.

## IN THE WORLD OF SPORT

Pat Moran, Manager of Philadelphia Nationals.

Photo by American Press Association.

Patrick J. Moran, manager of the Philadelphia National league club, is the early season sensation of the baseball world. When Pat succeeded Charley Doan as manager he began laying plans for a rejuvenated team. He secured a lot of youngsters and got rid of some of the old timers. "I don't care for vaunting stars," said Moran. "I want ambitious ball players." He was willing to part with Magree, Lobert, Doan and others. Whittier for Magree suited Moran, and many think it was a good play. It is hardly to be expected that he can win the pennant this year, but he has started out showing that he is a clever baseball man and will keep the Quaker team in the running. Moran joined the big league as a member of the Boston in 1901 as a catcher. He went to the Chicago Cubs in 1906 and since 1910 has been with Philadelphia.

## Motorboat Wonder For Drexel.

George W. Childs Drexel, the Philadelphia sportsman and commodore of the Corinthian Yacht club, is having built for himself the speed wonder of the 1915 crop of motorboats, a runabout which will be guaranteed to average thirty-two miles an hour. The boat will be called the Ace and will be about fifty feet in length and will have a beam of seven feet eight and one-half inches. Her lines and general appearance as to construction of the hull, coupled with the immense power to be installed, give every indication that the new craft will be able to attain a speed of about thirty-five miles per hour. For propulsion two eight-cylinder high speed motors will be installed in the boat, each of which is rated at about 200 horsepower. The boat is about one-third completed and will be ready for launching early in the coming motor boating season.

## Trout In Quarry Pits.

Abandoned granite quarry pits in Gloucester have yielded many more brook trout to the fishermen in that community in the open season than the brooks in the woodland, according to information received at the offices of the Massachusetts state fish and game commissioners. Edward Babson, secretary of the Cape Ann Fish and Game Protective association, was the first one to think of having the quarry pits stocked with trout, and two years ago six cases of fingerling trout were placed

in the three pits. This season, when many of the amateur fishermen found very few fish in the brooks, they cast their lines into these pits, and since then there has been a satisfactory catch all around. John E. Peterson is believed to have had the high line thus far, having caught forty nine trout in the pits in a short time.

**Yale's Great Infield.**

Yale this season boasts of the best college ball team in the east. An infield of Bush, first base; Millman, second base; Legore, shortstop, and Reilly, third base, is burning up the "Big Four." However, the brightest spot in the team is Harry Legore, who promises to be the best all round athlete Yale has turned out in years.

Legore, a former Mercersburg academy star, was the star of the football team last fall, easily the best kicker Yale had. He took a flier at basketball and is a streak on the track. But baseball is his pet pastime. Already he has received flattering offers from Connie Mack and John McGraw, the former really offering him a bonus to sign a contract. However, Legore hails from Legore, Md., and when they name towns after you one hardly could be interested in baseball.

**French Athletes Killed.**

Thouraus, the champion javelin thrower of France, has been killed in action near Ypres while leading an attack against a German position. He had recently been promoted adjutant of his regiment for conspicuous bravery. Three well known French footballers have also fallen. Elie Carpentier, the famous goalkeeper of the Olympique Lillois club, has been killed in the recent fighting at Beausjour. Carpentier was a sublieutenant in the Forty-first regiment of artillery. Mi-Jon and Andre Vernand, other well known soccer players, have also been killed in action.

**No Room For Doubt.**

An instructor at Harvard was mightily bothered by a precocious and intellectually quarrelsome student who refused to accept even the oldest of truths. The instructor was talking one day of archaeological diggings.

"But, doctor," interrupted the student, "it has never been proved definitely to my mind that Schliemann did discover the site of Troy."

The instructor sighed wearily.

"Mr. Jones," he remarked, "I believe that the truth of Dr. Schliemann's finding will be accepted even by you when I tell you upon oath that he discovered even the corncobs that remained after the Greeks had fed the wooden horse."

—New York Post.

## FAILURE.

Failing and being a failure are two entirely different things, and there are people who wring more success out of their misfortune than others do out of all the advantages showered upon them. It is not failing but staying down that makes a failure.

## \$100 REWARD. \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO., Toledo, O.

## WOMEN CALM AS THEY FACE DEATH

One Saw Torpedo Speeding to Send Lusitania to Doom.

## SURVIVOR'S STIRRING STORY

Passengers Had Been Thinking of Nothing but Possible Fate After German Threat, and as Ship Was Struck American Exclaimed, "By Heavens, They've Done It!"

Oliver P. Barnard, the scenic artist of the Covent Garden Opera, who told of A. G. Vanderbilt's bravery and Frohman's stoicism, gave the following account of the torpedoing of the Lusitania:

"It was my rare fortune to be one of four people who saw the torpedo of the German submarine fired at the Lusitania at a distance of probably not more than 200 yards. I had just come up from luncheon and was looking across an uncommonly calm and beautiful sea when I saw on the starboard what at first seemed to be the tail of a fish. It was the periscope of our assailant.

"The next thing I observed was the fast lengthening track of a newly launched torpedo. Itself a streak of froth. We had all been thinking, dreaming, sleeping and eating 'submarines' from the hour we left New York, and yet with the dreadful danger about to descend upon us I could hardly believe the evidence of my own eyes.

"An American lady rushed up to where I stood, exclaiming nonchalantly, 'This isn't a torpedo, is it?'

"I was too spellbound to answer. I felt absolutely sick.

**Hit With Terrific Impact.**

"Then we were hit. My impression of the contact of the torpedo was that it was an indescribably terrific impact, though not marked by anything such as the imagination might fancy in the way of a roar.

"The torpedo must have penetrated deeply into the side of the vessel and exploded internally.

"The point of contact was about beneath the grand entrance to the saloon, and the result of the explosion was that it blew everything in that immediate vicinity into smithereens. Then the tremendous water tanks on the tunnel deck burst, releasing their enormous contents and flooding everything.

"The moment the explosion took place the Lusitania simply fell over just as a house, kept up by underpinning, would topple the instant the main props were pulled out.

**Stunned and Astounded.**

"Instantly there was a tremendous rush of passengers to the deck from the saloon and lounge. I did not think that anybody, not even the women and children, were so much terrified as they were astounded and stunned by the consciousness that the fears, cherished half in ridicule for five days previously, had at last been realized and the German bluff had actually come off.

"By heavens, they've done it!" ejaculated a broad shouldered American whom I never saw again.

"That was the first universal thought. 'What shall we do?' was the next.

"Many people, evidently convinced that the Lusitania was unsinkable, made preparations to sit tight and let things take their course.

"My own first impulse was to obtain a life belt. Excitement and fright were now everywhere, but there was no panic. 'Keep cool' seemed to be everybody's motto, though there was on all hands a pell-mell scurry below to obtain life belts. Every second people reappeared singly, in pairs and in groups armed with belts, uselessly carried out in most cases and inadequately strapped on. Others forgot the belts and devoted themselves to hunting for their relatives.

**Brave Wireless Lad.**

"The last passenger I spoke to was a young American bride, Mrs. Steward Mason, the daughter of William Lindsay, an American manufacturer.

"Have you seen my husband?" she shrieked at me appealingly.

"I crossed over to the starboard side again, and on my way encountered the two Marconi operators in the emergency wireless room. They, too, were coolness personified. I learned from them that the explosion had put the main wireless room out of action. It also put out every electric light in the ship.

"Finding that he could do no more a young operator, superbly tutored and careless of what looked like sure

disaster for us all, took up a kneeling position on the funnel deck in order to make snapshots of the Lusitania settling to its doom.

"The 'snap' was probably the only one attempted in the whole ship, but it did not come off. A further lurch of the boat upset him and his plans, for the last glimpse I had of him was as he was going to sit down and swim.

"The glorious old cry of the sea, 'Women and children first,' was the unvarying rule on the Lusitania. Some man, whom I assumed to be an alien steerage passenger, was the only person to attempt to violate it.

"Certainly not more than fifteen minutes, or eighteen at the outside, ensued after the torpedo impact before the Lusitania was gone."

## Meteors as They Fall.

When a meteorite enters the earth's atmosphere it is moving with a velocity of more than twenty miles per second. The friction of its swift rush through the air produces a tremendous temperature, and the outer parts of the meteor are melted off and dissipated in fiery vapor, but the passage through the atmosphere is so quickly completed that the inner portions are not affected, and meteorites have been picked up after their fall and found to be freezing cold within. Their velocity is so rapidly reduced by the resistance of the air that when they strike the earth they usually penetrate only a few feet at the most into the soil.

## SAW VICTIMS FLOATING.

A passenger of the Canadian Pacific steamship Mississauga, from Halifax, which passed over the scene of the Lusitania disaster twenty-four hours later, immediately sent the following remarkable message to the London Times. He was then in ignorance of the truth:

"Saturday, 1:30 o'clock, I see floating deck chairs and a boat upon the bow of which I read the word 'Liverpool.' Our ship swings her around and on the other side the word 'Lusitania.' My God, it has happened!

"I realize that we are on the scene of a great tragedy. There are a pile of boats about. One contains a pair of boots and a hat. There are collapsible boats awash, some with sides not up. There is a whaleboat keel upward with a body lying over it, the lifebelt slipping off the neck. Yes, a dead man.

"Captain Evans, our commander, has 1,000 lives aboard his ship to get to safety, and up goes our speed, and we are dashing away on a zigzag course. Just now a bald head bobs up in the water not twenty-five feet away from us. It is ghastly in the sunshine.

"The water is almost motionless. The silence and impressiveness of it all are coupled with the dawning sense of our own danger. It has brought wonderful calm to all. Our women are fine-silent and sad, with full sympathy which overrides fear.

"We can do naught but race on, but by 6 o'clock tonight our risk will be over. Captain Evans' calm and dignity are fine, yet no man could live his previous twenty-four hours unmoved, and his own thoughts must have flown to his own son in the trenches."

## WENT DOWN WITH FUNNEL.

Philadelphia Man Tells of Miraculous Escape on Lusitania.

Samuel M. Knox of Philadelphia, who was on the Lusitania, gives this account of his escape:

"When it was certain the liner was sinking I went overboard at once and attempted to get clear of the ship which was coming over slowly. I was caught by one of the smokestacks and carried down a considerable distance before being released.

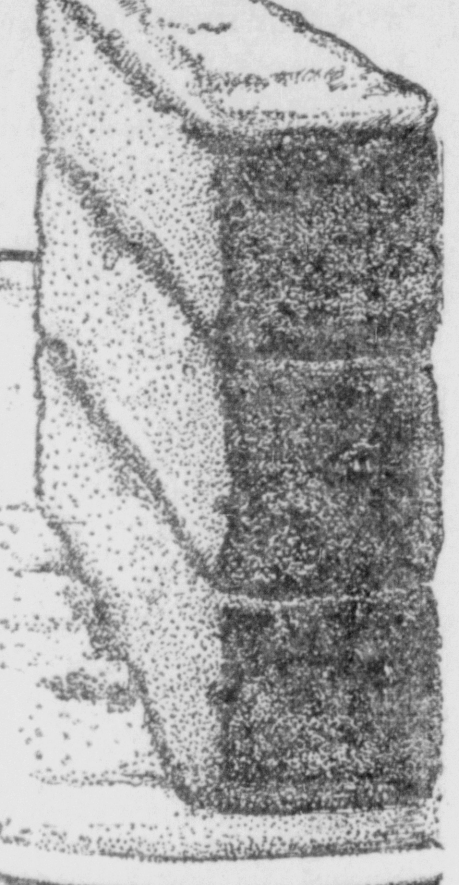

"On coming to the surface I floated about for a considerable time, when I was picked up by a life raft.

"This raft, with others, had floated from when the vessel sank and had been picked up and taken in charge by Mr. Gauglett of Washington and Mr. Lauriat of Boston, who picked up thirty-two persons in all. It was equipped with oars, and we made our way to a fishing smack about five miles distant, which took us on board, although it was already overloaded."

## A Seventy-Year-Old Couple

Mr. and Mrs. T. B. Carpenter, Harrisburg, Pa., suffered from kidney trouble for many years but have been entirely cured by Foley Kidney Pills. He says: "Although we are both in the seventies we are as vigorous as we were thirty years ago." Foley Kidney Pills stop sleep disturbing bladder weakness, backache, rheumatism and aching joints. For sale by H. P. Dunn, druggist.—Adv't. mwf

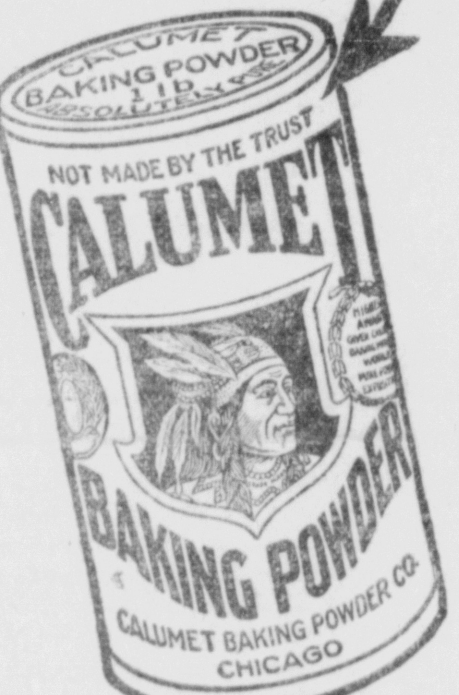

## Good To the Last Slice

## When Made With

Calumet pastry is good to look at, good to eat. Always light, fluffy, tender and wholesome. Calumet is the one baking powder that is high in quality and moderate in price.
